

COUNTY GOVERNMENT OF
MARSABIT

REPUBLIC OF KENYA

THIRD COUNTY INTEGRATED DEVELOPMENT PLAN (2023-2027)

COUNTY VISION, MISSION AND CORE VALUES

VISION

To be a cohesive and prosperous county of choice.

MISSION

To spearhead transformative and sustainable development towards achieving quality life for all county residents.

CORE VALUES

*National values as spelt in the constitution Article 10 will be observed. The County core values are based on a mnemonic **PEACE** as follows:*

Prosperity

Excellence

Accountability

Cohesion

Equity

6.3 Dissemination, Feedback Mechanism, Citizen Engagement and Learning	245
6.4 Evaluation Plan.....	245

Foreword

The **CIDP 2023-2027** is our third medium term plan to be developed by the county since the beginning of devolution. It endeavours to translate our people's aspirations into priorities, a clear set of outcomes, output measures and the required resources to transform the lives and livelihoods of Marsabit people. The development of this plan has been highly consultative; undergoing through public participations across the county, stakeholders' involvement among other county wide engagements. It is my utmost expectation that the elaborate, inclusive and participatory processes during its preparation will guarantee ownership and commitments, individually and collectively, towards the implementation. I pledge my personal commitment and support during the entire implementation period and beyond.

The implementation of the second generation CIDP (2018-2022) experienced by many challenges ranging from slowdown growth of the economy underpinned by the ongoing Russia-Ukraine conflict, elevated global inflation, lingering effects of the COVID-19 pandemic, climate change related supply chain disruptions- prolonged drought which greatly affected our county, internal conflicts in the county among others. This caused many projects to remain stalled, increase in pending bills and shelving of some projects to address recurrent emergencies, all those issues hindered the county from achieving its full potential.

Aside from these challenges, the county achieved various strides some of which includes: increased access to clean & safe water by constructing many water infrastructure, provision of equitable and affordable health care by construction and upgrading health facilities, provision of state of arts modern health equipment, employment of additional medical personnel, improved road network by constructing of new roads & upgrading the existing ones, increase enrolment, transition & retention by provision of bursaries among many others.

A sustained momentum, synergy and collaboration amongst all development stakeholders are vital as we strive to meet our development desires. I am confident that the successful implementation of this Plan will lead to tangible and sustainable transformation of our society.

We look forward to a stronger, prosperous and a cohesive Marsabit

H. E HON. MOHAMUD MOHAMED ALI
Governor, Marsabit County

Acknowledgement

The development of CIDP (2023-2027) was successful with the concerted effort and contribution of many organizations, institutions, communities and individuals. We would like to thank all for the generous support and inputs.

We recognize the contribution of Marsabit County Government team including: County Executive Committee Members, Chief Officers, Directors, and other technical staffs who played essential role during the sector working group meetings. Without their dedication, cooperation and technical contributions, the content of this document would not have been sound. At the public consultations, different communities in all the 20 wards were reached and

we would like to thank them for sharing their dreams and for their inputs that greatly shaped the evolution of this document.

We would also like to acknowledge the political leadership led by Governor H.E. Hon. Mohamud Mohamed Ali and the Deputy Governor H.E Solomon Gumbo for the able leadership in development of this document.

Special appreciation goes to Mr. Tache Elema, Chief Officer Economic Planning Mr. Samwel Mukindia, Director Economic Planning and other Planning Team : Mr. Qalicha Roba, Mr. Somo Mohammed, Mr. Hachu Dulacha, Mr. Mio Denge, for their role in coordination and compilation of this document.

Gratitude is owed to the State Department of Planning for providing CIDP preparation guidelines, Concern Worldwide, United Nations Development Programme (UNDP), and other development partners for both financial and technical support in CIDP preparation process. Finally, we recognize the contributions of organizations and individuals not mentioned but contributed to the successful development and completion of this document

Glossary of commonly used terms

Baseline	Baseline is an analysis describing the initial state of an indicator before the start of a project/programme, against which progress can be measured.
Demographic Dividend	The demographic dividend is the accelerated economic growth that may result from a decline in a country's mortality and fertility and the subsequent change in the age structure of the population.
Evaluation	Evaluation is an objective assessment of an ongoing or completed project, programme or policy, its design, implementation and results to assess its relevance, efficiency, effectiveness, impacts, sustainability and fulfilment of objectives.
Flagship/Transformative Projects	These are projects with high impact in terms of employment creation, income generation and increasing overall competitiveness of the county. They may be derived from the Kenya Vision 2030 (and its MTPs) or the County Transformative Agenda.
Impacts	Impacts are overall influence on communities and target groups. For example the results of achieving specific outcomes, such as reducing poverty or creating jobs.
Indicator	An indicator is a unit to assess progress/change that result from implementation of a project. It measures a change in a situation or condition and confirms progress towards achievement of a specific result.
Monitoring	Monitoring is the process of systematically collecting, analysing and reporting data on a project or programme's inputs, activities, outputs, outcomes and impacts in order to provide managers, decision makers and other stakeholders with regular feedback on progress in the implementation of activities specified in the development plans.
Programme	A grouping of projects or services offered by a sector or department to achieve a specific objective. The programmes are couched on strategic objectives.
Project:	A project is a set of coordinated activities implemented to meet specific objective within defined frame of time, cost and performance parameters. Projects with a common goal forms a programme.
Project outcome	a measure of intermediate results generated to meet objective of an intervention. It describes the actual change in situation as a result of an intervention output(s) such as changes in practice or behavioural change resulting from a programme or project.
Output	Immediate result from conducting an activity, such as, goods and services produced
Results	These are the outputs, outcomes or impacts, either intended or unintended, positive or negative resulting from a development intervention.
Target	Refers to premeditated level of an indicator achievement.

Executive Summary

The third generation County Integrated Development Plan, (CIDP) 2023-2027 is a master document that lays the road map to coordinate the efforts of the county government, the national government and other development partners in their efforts to link the economic, social, environmental, legal, and spatial aspects of development in accordance with the development priorities and needs of the local communities. The structure of this CIDP is prescribed by the County Government Act and comprises six chapters and selected annex. Chapter one of the CIDP describes the county overview. It covers the physiographic and natural conditions, administrative units, and demographic features. Additionally, it provides the political units, specifically the constituencies and wards.

Chapter two presents the performance review of implementation of the previous CIDP 2018-22, and it describes the county performance in terms of revenues, expenditures and key outcomes as well as the major challenges faced in the implementation of the plan. The overall aim of the review is to highlight salutary lessons at the departmental and sector levels, to distil lessons in planning and implementation of programmes/projects in order to inform planning and implementation of 2023-27 CIDP.

Chapter three provides the spatial framework within which development projects and programmes will be implemented. The chapter highlight several thematic areas, including resource potential growth areas, the strengths and opportunities, strategic geographical locations, existing natural resources and proposed infrastructure projects, emerging technologies in ICT and the potential for modernizing agriculture, among others. Aspects around spatial distribution of county livelihood, status of water resources and spatial distribution of health facilities in the county are also captured.

Chapter four provides sector development priorities, strategies, programmes, flagship projects, and cross-sectoral linkages. It also provides a highlight of the priority areas of interventions to deliver the county development goals, strategies and priority programmes, sub-programmes and projects for the county alongside with the sectoral synergies and impacts. The flagship projects to be implemented in the county are also identified, plus the linkages of the CIDP with different SGD goals.

Chapter five outlines the county's institutional arrangement and their specific roles towards implementation of the third generation CIDP. In addition, the chapter presents the resource mobilization and management framework, asset management, and risks and risk mitigation measures. It also describes the stakeholders in the county and spells out their roles and how their functions are made synergistically complementary. The chapter also elaborates the resource requirements, sources of resource streams, resource deficit and mobilization strategies for additional resources to address the resource gaps.

Chapter six contains an overview of the Monitoring, Evaluation, and Learning (MEL) framework for the period beginning 2023-27. The Monitoring and Evaluation structure ensures that the intended goals are met throughout the planning and execution of development programmes, and lessons learned are applied to improve the efficiency and effectiveness of ongoing and future programs. Lastly, the annex contains the county fact sheet, CIDP preparation steps and timelines and integration of population issues into the CIDP.

CHAPTER ONE: COUNTY OVERVIEW

1.1 Background

Marsabit County is located in Northern Kenya and lies along the Great North Road making it easily accessible by road from Nairobi. The county headquarters is at Marsabit town which is approximately 531Km from Nairobi city. The county has two main towns i.e. Moyale and Marsabit, and other smaller urban centers such as Sololo, Loiyangalani, and Laisamis, North Horr, Maikona, Turbi , Logologo, among others.

The county has one indigenous forest known as Mt. Marsabit, with a size of 152.8 km² and is home to Marsabit Game Reserve and Sibiloi National Park. Marsabit forest, with its endemic flora and fauna, is the only gazetted forest in the county. There are two forests, Mt. Kulal and hurri hills belong to non gazetted forests, and has a total area hectarage of 750 km².

The County is a member of Frontier Counties Development Council (FCDC) regional economic block and host 14 distinct communities, these includes: Borana, Gabra, Rendille, Burji, Turkana, Dasenach, Konso, Samburu, Garre, El Molo, among others. There are also other Kenyan communities who have settled in the county because of their employment or for purposes of doing business. These communities are - Meru, Kikuyu, Kamba, Luo, Somali virtually all Kenyan communities who are mostly engaged in own businesses or employed.

Although agricultural production in the county includes diverse activities - livestock keeping, crop production, bee keeping, fishing and agroforestry is the main economic activity in the County, the livestock keeping predominates. Approximately 81%, 16%, and 3% of the population is engaged in

pastoralism, agro-pastoralism, and other livelihoods respectively. The livestock types reared in the county include cattle, goats, sheep, camels, donkeys, and poultry. Bee keeping is also practiced, and fishing is mainly done in Lake Turkana area. The crops grown are maize, green grams, wheat, teff, beans, millet, vegetables (kales) and fruits (mangoes, oranges and avocados). Fruit trees are considered as part of agroforestry, a practice limited to areas around Mt. Marsabit and Sessi in Moyale. However, the low and erratic rainfall in most parts of the county restricts crop production to few areas.

1.2 Position and Size

Marsabit County is located in the extreme part of northern Kenya and lies between latitude 02°45' North and 04°27' North and longitude 37°57' East and 39°21' East. The county has a total area of 70,961.2 km², it is thus the biggest county in Kenya by land mass. It has an international boundary with Ethiopia to the north, borders Turkana County to the west, Samburu County to the south and Wajir and Isiolo counties to the east. Map 1 shows the location of Marsabit County within the map of Kenya.

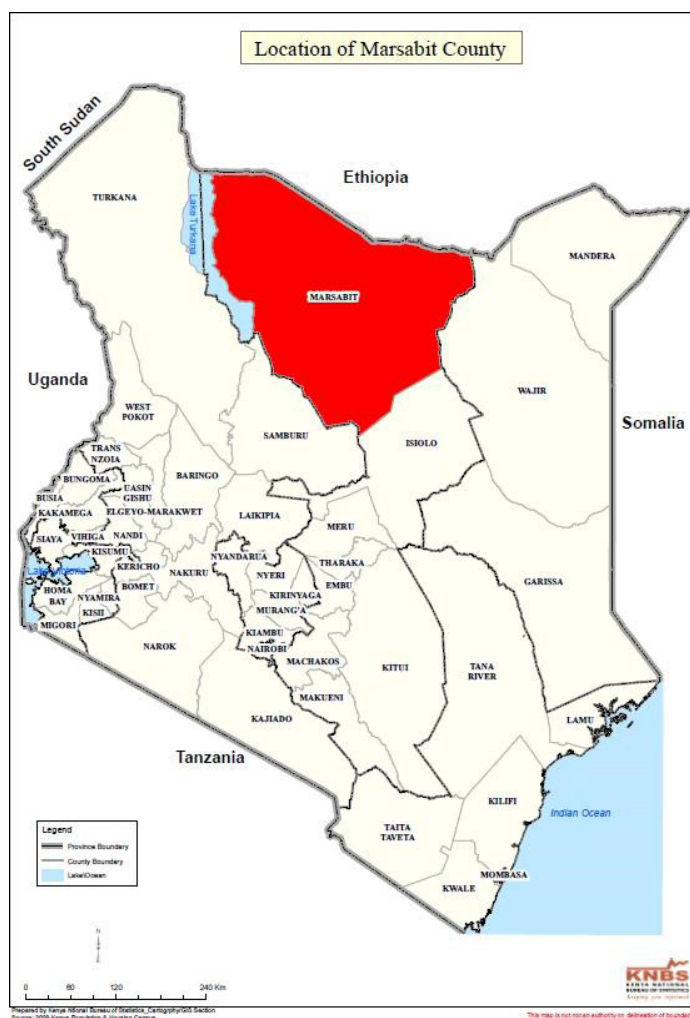

Figure 1.1: Location of the County in Kenya (Source: KNBS)

1.3 Physiographic and Natural Conditions

1.3.1 Physical and Topographic Features

The County fall within arid and semi-arid area which constitutes an extensive plain lying between 300 and 900m above sea level, sloping gently towards the southeast. The plain is bordered to the west and north by hills and mountain ranges and is broken by volcanic cones and calderas. The most notable topographical features of the county are Ol Donyo Ranges (2,066m asl) in the south west, Mt. Marsabit (1,865m asl) in the central part of the county, Hurri Hills (1,685m asl) in the north eastern part of the county, Mt. Kulal (2,235m asl) in the north west and the mountains around Sololo-Moyale escarpment (up to 1,400m asl) in the north east.

There are no permanent rivers in the county, but four drainage systems exist, covering an area of 948 sq km. Chalbi Desert is the largest of these systems. The extensive Chalbi Desert which forms a large depression covering an area of 948 sq km, lying between 435 and 500m elevation. The depression is within the Great Rift Valley and is separated from Lake Turkana, which is 65 -100m lower in elevation, by a ridge that rises to 700m.

The depression receives run-off from the surrounding lava and basement surfaces of Mt. Marsabit, Hurri Hills, Mt. Kulal and the Ethiopian plateau. The seasonal rivers of Milgis and Merille to the extreme south flow eastward and drain into the Sori Adio Swamp. Other drainage systems include the Dida Galgallu plains which receive run-off from the eastern slopes of Hurri Hills, and Lake Turkana into which seasonal rivers drain from Kulal and Nyiru mountains.

1.3.2 Climatic Conditions

Most parts of the county are arid with the exception of high potential areas around Mt. Marsabit, Mt. Kulal, Hurri Hills and the Moyale-Sololo escarpment. The county experiences tropical climatic conditions with extreme temperatures ranging from a minimum of 15°C to a maximum of 26°C, with an annual average of 20.5°C (World Weather and Climate Information, 2015). Rainfall ranges between 200 and 1,000mm per annum and its duration, amount and reliability increases with the altitude. North Horr (550m) has a mean annual rainfall of 150mm; Mt. Marsabit and Mt. Kulal 800mm while Moyale receives a mean annual rainfall of 700mm. The long rainy season starts from the month of October-December, while short rain season begins from March-May annually. However, the seasonal patterns have been disrupted by human induced climate change and today the county experience erratic rainfall patterns.

1.3.3 Ecological Conditions

Marsabit County lies in four main ecological zones: Ecological Zone II, Ecological Zone IV, Ecological Zone V and Ecological Zone VI.

Ecological Zone II - Forest Zones (Sub-Humid)

The zone is characterized by high rainfall amounts of up to 1,000mm per annum, low evapo-transpiration and high suitability for crop production. The. This zone has soils that are suitable for agricultural production and it includes parts of Mt. Marsabit (above 1,500m) and Mt. Kulal (above 1,700m) which supports dense evergreen forests. Although this cover just about one per cent of the county, this ecosystem is an important water catchment area.

Ecological Zone IV - Woodland Zone (Semi-Arid)

The zone is semi-arid with a medium potential and constitutes the lower slopes of Mt. Marsabit, the middle slopes of Mt. Kulal and the top of Huri Hills. Areas of Sololo and Moyale are also included in this zone. In the recent past, this semi-arid space has become an area of sedentarized agro-pastoral activities.

Ecological Zone V - Bushland Zone (Arid)

These areas are characterized by steeper slopes which may favour greater surface run-off and hence may experience greater sheet wash erosion. This zone includes the lower slopes of volcanic and basement piles lying between 700 and 1,000m. The soils are shallow and stony clay loams with rock outcrops. The flatter areas are covered by grass. The zone consists of the plains of Dida Galgallu, Bule Dera, Milgis and parts of the slope of Mt. Marsabit and Huri Hills.

Ecological Zone VI - Dwarf Scrubland Zone (Very Arid)

This is the most extensive zone in the county. The typical vegetation is dwarf-shrub grassland or a very dry form of bushed grassland. The extremely dry areas may be properly termed "bushed stoneland". The zone includes all the hills and plains below 700m. Grazing season in these areas is extremely short, lasting not more than two months after the rains. When the rain fails, the only vegetation available in this area is dwarf-shrub, which supports goats and camels, but not cattle.

1.4 Administrative and Political Units

1.4.1 Administrative Units

This section provides background information that describe the administrative and political units of the county. Administratively, Marsabit County is divided into seven sub-counties, namely; Marsabit Central, Marsabit South, Marsabit North, Loiyangalani, Sololo, North Horr and Moyale. As shown on the map (figure 1.2) and the Table 1.1 below which depicts the area in sq. km of the county and the sub-counties.

1.4.2 County Government Administrative wards by constituency

Across the four constituencies (Saku, Laisamis, North Horr and Moyale) the county has 20 assembly wards, 58 Locations and 112 sub locations. The county intends to establish county villages based on the existing sub-locations.

Figure 1.2 shows the boundary demarcations for the four constituencies in the county.

Table 1.1: Area (Km²) by Sub-County

Sub-County	# of Divisions	# of Locations	# of sublocations	Area (Km²)
Loiyangalani	3	11	23	11,789
Marsabit Central	3	9	18	2,143
Marsabit North	3	10	24	19,837
Marsabit South	2	13	25	8,447
Moyale	3	10	17	3,327

		LAISAMIS	5,811	6,925
Sub total		5	28,104	33,446
TOTAL		20	141,708	166,912

IEBC 2022

From the table above, Moyale constituency registered highest number of voters with 66,402. Compared to 2017. The total number of registered voters increased by 10,738 votes. Marsabit is considered a youthful county with the highest number of registered voters being young. The youthful leaders were majority elected members of County Assemblies.

1.5 Demographic Features

1.5.1 Population Size, Composition and Distribution

Over the years, Marsabit county have experienced rapid population growth. In 2009, the total population of Marsabit county was 291,069 persons that is 151,061 males and 140,011 females, while in the last census of 2019 the total population was 459,785 persons, comprising 243,548 males and 216,219 females. Over the period of 10 years, the total population grew by 168,716 constituting a growth rate of almost 58%. From the demographic summary of the population, the proportion of male to females is still high across most of the cohorts. The youthful population of the county below the age of 19 is more than half the total proportion of the population accounting to 58% of the total population. This shows that the county requires urgent investment in the education, health, nutrition and water to avoid instances of strain on the existing investments. Population growth should also be managed to allow for a sustainable growth pattern.

Population distribution by special age group as shown below is very important for planning purposes. It usually helps policy makers put in place strategies to address age-specific needs and address issues like mortality for children below 5years old, education for school-age children, labor force and the dependent population.

County Population Age Structure

Table 1.4: Population Projections (by Sub-County and Sex)

Sub-county	Census (2019)				Projection (2022)			Projection (2025)			Projection (2027)		
	M	F	Intersex	T	M	F	T	M	F	T	M	F	T
Loiyangalani	17,659	18,051	3	35,713	18,105	21,180	39,100	20,705	21,169	41,874	21,703	22,189	43,892

Source: KNBS

Where **M** is male, **F** is female and **T** is Total

NB: 1. Intersex population is too small to be projected at sub-county level.

According to the 2019 Kenya Population and Housing Census, The National population was 47,564,296 persons, with Male population consisting of 23,548,056 and female population consisting of 24,014,716 persons and 1,524 inter-sex, while the County population was 459,785 consisting of 243,548 males, 216,219 females and 18 inter-sex, as indicated in table 1.4. Compared to the national population, the county constitutes 1% of the Total population. The county has a population growth rate of 3.4% , While nationally the growth rate is at 2.2%, with a population projection of 539,101 and 565,091 by the end of the year 2025 and 2027 respectively, and the National Projection for the year 2025 will be 53,330,978 while for the year 2027 it will be 55,123,051 respectively.

Table 1.5: Population Projections by Age Cohort

Age Cohort	2019 (Census)			2022 (Projection)			2025 (Projection)			2027 (Projection)		
	M	F	T	M	F	T	M	F	T	M	F	T

Table 1.4 gives the County population projections in 2022, 2025 and 2027 by age cohort based on the 2019 Kenya Population and Housing Census. The table further indicates that the male population projections from age cohorts 0-4, 5-9, 10-14, 15-19, 20-24 and 25-29 remain slightly higher than that of female counterpart.

From the above data, the largest age cohort is 0-9 with a population of 144,376 having projection of 152768, 156144, 160828 for the years 2022, 2025 & 2027 respectively which is almost a third of the county's population necessitating a high level interventions for early childhood development and health facilities.

Table 1.6: Population Projections by Urban Area

Urban Area	Census (2019)			2022 (Projection)			Projection (2025)			Projection (2027)		
	M	F	T	M	F	T	M	F	T	M	F	T
Moyale	24,202	23,648	47,850	24,813	27,747	52,388	26,709	29,565	56,104	28,094	30,884	58,809
Marsabit	18,846	17,441	36,289	19,322	20,464	39,730	20,798	21,805	42,549	21,877	22,778	44,600
Sololo	3,929	3,754	7,683	4,028	4,405	8,412	4,336	4,693	9,008	4,561	4,903	9,443
Loiyangalani	2,340	2,853	5,193	2,399	3,347	5,685	2,582	3,567	6,089	2,716	3,726	6,382

Laisamis	2,697	2,350	5,047	2,765	2,757	5,526	2,976	2,938	5,918	3,131	3,069	6,203

Source: KNBS

The population growth, expansion of the youth population and the impact of recurrent droughts upon the pastoralist communities have resulted in rapid levels of urbanization in the county. Moyale urban centre is expected to grow at the fastest rate recording an increase of 3,716 and 2,705 persons in the years 2025 and 2027 respectively from a projection of 52,388 in year 2022 to a new population of 58,809 by the year 2027. Marsabit urban centre will record the second highest growth rate noting an increase of 2,819 and 2,051 persons in years 2025 and 2027 respectively from a projection of 39,370 in year 2022 to a new population of 44,600 by the year 2027. Sololo and Laisamis urban centres will also record increased population of 596 and 292 in year 2025 respectively, while recording increases of 435 and 285 persons in year 2027 respectively. Similarly Loiyangalani and North Horr urban centres will record an increase of almost the same number of persons in the projected years.

The urban population growth creates a need for investment in urban planning including sewerage systems, water provision in our urban centres, markets improvements, green parks establishment, public transport investments, investments in health and education facilities and solid waste disposal system more so, attention be given to the fastest growing urban centres.

1.5.2 Population Density and Distribution

Density refers to number of persons per square kilometre, obtained by dividing the enumerated persons by the size of the land area in a given area, expressed in square kilometres. Since population density can be used to quantify demographic information and to assess relationship with ecosystem, health and infrastructure. The focus of planning on the cities should be on the density of the population so that cities can grow and shrink in areas, if a neighborhood is sparse then efficiency is lost.

Table 1.7: Population distribution and density by Sub-County

Sub-County	2019 (Census)			2022 (Projection)			2025 (Projection)		2027 (Projection)	
	Area (KM ²)	Population	Density	Area (KM ²)	Population	Density	Population	Density	Population	Density
Loiyangalani	11,789	35,713	3	11,789	39,100	3	41,874	4	43,892	4
Marsabit Central	2,143	79,181	37	2,143	86,690	40	92,840	43	97,316	45
Marsabit North	19,837	54,297	3	19,837	59,446	3	63,664	3	66,733	3
Marsabit South	8,447	65,376	8	8,447	71,576	8	76,654	9	80,349	10
Moyale	3,327	108,949	33	3,327	119,281	36	127,743	38	133,902	40
North Horr	19,337	71,447	4	19,337	78,223	4	83,772	4	87,811	5
Sololo	6,064	44,822	7	6,064	49,073	8	52,554	9	55,088	9

Source: KNBS

Marsabit central will have a projected highest population density of forty (40) persons per Km. Sq followed closely by Moyale Subcounty with a density of thirty six (36) persons per square kilometre. Loiyangalani and Marsabit North are three (3) persons per Sq. Km respectively being sub counties with the least population density. The demand for social amenities in Marsabit central and Moyale will be highest since most persons are concentrated in the sub-counties while the same will have the least demand in the other two sub-counties of Loiyangalani, Marsabit North, North Horr, Marsabit South and Sololo.

Consequently, the population density projections for Marsabit central sub-county will have 43 and 45 persons per Sq. KM in the years 2025 and 2027 respectively while Moyale Will have a projected population density of 38 and 40 in the same period. Marsabit North will record the least population density of 3 persons per Sq. Km in years 2025 and 2027 respectively. An increased population density will put more pressure on the land and natural resources hence, instances of land degradation and effects of climate change will likely to happen. As such, attention should be give to priority activities that addresses the impacts in the County.

1.5.3 Population Projection by Broad Age Groups

Table 1.8: Population Projections by Broad Age Groups

Age Group	2019 (Census)			2022 (Projection)			2025 (Projection)			2027 (Projection)		
	M	F	T	M	F	T	M	F	T	M	F	T
Infant Population (<1 Year)	5,308	5,244	10,552	7,996	7,698	15,694	8,459	7,708	16,167	8,794	8,012	16,806
Under 5 Population	35,196	33,964	69,160	39,753	38,273	78,025	42,057	38,322	80,379	43,719	39,833	83,552
Pre-School (3- 5 Years)	24,131	23,110	47,241	23,219	22,808	46,027	24,157	22,956	47,113	25,117	23,508	48,625

Women of Reproductive Age (15 – 49yrs)	94,265			124,204			139,093			148,017		
Economically Active Population (15 – 64 Years)	124,907	105,160	230,067	131,077	134,878	265,955	146,961	150,124	297,085	157,467	160,062	317,529
Aged (65+)	7,257	6,630	13,887	5,785	6,573	12,358	5,869	7,129	12,998	5,829	7,339	13,168

Source: KNBS

Nationally there is a rapid population growth, this has resulted in Marsabit County having extremely youthful population, at the time of the 2019 census, more than half of the county's population was below the age of 19 years. This youthful dominated population profile indicates the need for urgent investment in education, nutrition, health and water. The under-fives age cohort will increase from 78,025 in 2022 to 80,379 and 83,552, marking an increase of 2,354 and 3,173 persons in the year 2025 and 2027 respectively. Primary school (6-13 years) population is projected to increase from 117,593 in 2022 to 118,989 and 120,796 in years 2025 and 2027 respectively marking an increase of 1,396 and 1,807 in 2025 and 2027 respectively. The youth (15-29) years cohort is projected to increase from 164,004 in 2022 to 179,685 and 187,982 marking an increase of 15,681 and 8,297 in 2025 and 2027 respectively. The reproductive Age (15-49) years based on the projections above will increase from 124,204 in 2022 to 139,093 and 148,017 in years 2025 and 2027 respectively. The labour force (15-64 years) cohort is projected to increase from 265,955 in 2022 to 297,085 and 317,529 in years 2025 and 2027 respectively.

1.5.4 Population of Persons with Disability

Table 1.9: Population of Persons with Disability by Type, Age and Sex

Type	<5			5 – 14			15 – 24			25 – 34			35 - 54			55+		
	M	F	T	M	F	T	M	F	T	M	F	T	M	F	T	M	F	T

Source: KNBS

In 2019 census, the number of persons living with disabilities in the county was 4,769 as shown in the table above, with the greatest proportion of these having visual and physical disabilities.

1.5.5 Demographic Dividend Potential

Evidence shows counties are at different stages of the demographic transition. It is, therefore, necessary to make county specific strategic investments in the four focus areas of the Demographic Dividend, namely: health and wellbeing; education and skills development; employment and entrepreneurship and rights, governance and youth empowerment as guided by the latest County Adolescent and Youth Survey Reports and Kenya's Demographic Dividend Roadmap. It is, therefore, imperative for each county to prioritize interventions that will enhance the achievement of its respective demographic dividend and hence economic transformation. (Reference documents are available on www.ncpd.go.ke).

This section provides a brief on the analysis of the county demographic dividend potential based on the data in Table 1.10. Key areas requisite to achievement of demographic dividend lies on the link of [Section 1.3 on page 23](#) and section on Integrated **Planning and Population focused**. Harnessing the demographic potential is anchored on minimum of five pillars or wheels: (i) Demographic Transition; (ii) Education; (iii) Health; (iv), Economic Reforms and Job Creation; and (v) Governance and Accountability. All the five policy pillars are interrelated and should be implemented concurrently in order to drive the country/county towards the economic prosperity that can result from the demographic potential.

Table 1.10: Demographic Dividend Potential

Category	2019	2023	2024	2025	2026	2027
Population Size	459,785	515,292	527,197	539,101	552,096	565,091
Population below 15 (%)	46.94	43.93	43.20	42.48	41.97	41.48
Population 15 – 64 (%)	50.04	53.63	54.38	55.11	55.66	56.19
Population above 65 (%)	3.02	2.44	2.42	2.41	2.37	2.33
Dependency Ratio	99.85	86.47	83.88	81.46	79.66	77.97
Fertility Rate	7	6.7	6.6	6.5	6.4	6.4

Source: KNBS

The population of Marsabit County was 459,785 people in 2019 according to the Kenya Population and Housing census. This population is projected to rise to 565,091 in the year 2027. The population is quite youthful with 46.9 percent of the population below age 15 and expected to decline to 41.48 percent by the year 2027. The fertility is also expected to decline to 6.4 from the average of 7 based on the 2019 census results. This will result in a corresponding increase in proportion of the population in working ages (15-64years) from 50% to 56.19 % over the same period. Consequently, the proportion of older people above 64 years will remain almost unchanged at nearly 2%, therefore, recording dependency ratio of 77.97 which is lower than the 2019 dependency ratio of 99.85.

1.6 Human Development Index

The HDI measures human development based on the basic factors of a long and healthy life, the acquisition of knowledge, and a reasonable standard of living. These factors are measured using the life expectancy at birth (Marsabit county for the last four years have invested heavily in various health facilities constructions and equipping with drugs and personnel) Secondly, adult literacy rate and the combined enrolment ratio at primary, secondary and tertiary levels noted to have improved over the years and lastly GDP per capita measured in purchasing power parity (PPP).

The County HDI stands at 0.4375 compared to a National average of 0.575. IGAs and SMEs awareness among the county residents have greatly improved.

The HDI is not designed to assess progress in human development over the short term because two of its component indicators - adult literacy and life expectancy at birth - are not responsive to short-term policy changes.

1.7 Multi-dimensional poverty

The monetary poverty rate for Marsabit is 63.2% which is 36-percentage point higher than the national rate of 35.7% with approximately 290,358 people in Marsabit being monetarily poor. Marsabit has a multidimensional poverty rate of 85.8%, which is 22-percentage point higher than the monetary poverty rate of 63.2% with a total of 394,561 people being multidimensionally poor.

When disaggregated by age groups, 85.3% of children in Marsabit are multidimensionally poor. This is 33-percentage points higher than the national average of 52.5%. Among the youths, 83.3% are multidimensionally poor compared to a national average of 48.1% while for the elderly population, 91% are multidimensionally poor compared to a national average of 55.7%.

Among children aged 0-17, the core drivers of multidimensional poverty are nutrition (87%), housing (83.8%), information (79%) and water (60.4%). For youths aged 18-34, the core drivers of multidimensional poverty are housing (79.9%), nutrition (76%), education (74.5%), sanitation (71.4%) and economic activity (55.8%). Among adults aged 35-59, the core drivers of multidimensional poverty are education (90.2%), housing (80.2%), economic activity (80.4%), and sanitation (69.9%). Among the elderly aged 60+, the core drivers of multidimensional poverty are education (95.9%), housing (88.9%), nutrition (88.6%), and sanitation (78.5%).

CHAPTER TWO: PERFORMANCE REVIEW OF THE PREVIOUS CIDP PERIOD

2.0 Overview

County Integrated Development Plan (CIDP) is prepared pursuant to section 108 of the County government act 2012 to among others provide a five-year plan to guide development planning. The CIDP plan provides a framework for planning, budgeting, funding, monitoring and evaluation of programmes and projects for five-year terms. It ensures Counties priority programmes and projects are aligned to the national aspirations as contained in the Kenya Vision 2030 and its Medium-Term Plans. The National Treasury and Planning issues guidelines and budget circulars in preparation of county plans and budgets and that informed the development of CIDP 2018-2022, which is being reviewed. As such, this chapter gives an overview of the achievements made during the implementation of the 2nd generation CIDP, 2018-2022, as well as the challenges faced and the lessons learnt during the plan execution. It also provides analysis of county performance in terms of revenues, expenditures, and key outcomes achieved during the implementation of the 2018-2022 plan.

2.1 Analysis of the County Revenue Sources

The programs and projects envisaged to be implemented in the CIDP 2018 – 2022 were partly executed. County departments planned sectoral key priorities and strategies to achieve the desired development results. However, while some achievements were realized during the review period, the County went through multiple challenges which greatly impacted programs and projects implementation. Marsabit County experienced successive four consecutive rain failures which caused massive livelihood losses in terms of livestock death and crop failures. Other challenges include inter-tribal conflicts that rocked the County for the entire period under review, Covid 19 outbreak and desert locust invasion to mention but a few. The prevailing context slowed down development projects as funds were reallocated to address the overwhelming humanitarian emergencies.

During the period under review, the county government received funds towards the implementation of its programmes from four main streams namely National equitable share, Conditional grants (GoK), Non-conditional grants (development partners), locally sourced revenues and others revenue streams respectively. These are depicted in table 2.1 below. The total revenue received into the county revenue fund during the period was KES 29,348,313,484.00 against a total budget of KES 42,535,000,000.00 representing approximately 69% of the county total budget or a variance of KES 13,186,686,516.00.

Table 2.1: Analysis of County Revenue Sources

Types of revenue	Revenue projections (CIDP)	Actual revenue	Variance	% of actual revenue
Own source revenue	605,000,000	475,161,173	129,838,827	1.62%
Equitable share	31,000,000,000	26,667,530,213	4,332,469,787	90.82%
Conditional grant (GoK)	1,450,000,000.00	1,221,491,619.00	228,508,381	4.16%
Donor funds	480,000,000.00	939,315,671.00	459,315,671	3.20%
other sources	9,000,000,000.00	59,239,000.00	8,940,761,000	0.20%
Grand Total	42,535,000,000	29,362,737,676	14,090,893,666	100%

During the period under review, equitable share to the county amounted to Ksh 26,667,530,213 accounting for 90.82% of the total funds received. However, the deficit still accounts for 4,332,469,787. The total collection under the county own resources was Kshs. 475,161,173 against a target of Ksh 605,000,000 representing 1.62% of the total funds received during the period under review. Overall, own source revenue missed the target by approximately Ksh. 129 M. This is illustrated in table 2.2 below. Among the factors cited for the low collection was majorly attributable to the effects of covid-19, insecurity due to tribal clashes, political instability in the neighboring country of Ethiopia where the cross border trade was affected and severe drought that led to the loss of livestock and revenue leakages due to expansive porous border. The county did not create any new revenue base during the period under review.

Table 2.2: Performance of local revenue 2018-2022

FY	Targeted	Actual	Variance	% variance
2018/2019	140,000,000.00	137,419,761.25	2,580,238.75	2%
2019/2020	150,000,000.00	126,705,276.00	23,294,724.00	16%
2020/2021	155,000,000.00	110,368,253.00	44,631,747.00	29%
2021/2022	160,000,000.00	100,667,883.00	59,332,117.00	37%
Total	605,000,000.00	475,161,173.25	129,838,826.75	21%

2.2 County Budget Expenditure Analysis

This sub-section will provide analysis on requirement as set out in the CIDP vs. allocation through the budgeting processes. The discussion will provide information on the likely effects of funding gaps on performance; and the efforts made to bridge the gap (Cost saving measures, partnerships, PPPs among others).

An important County development component is its revenue and expenditure outlook. The County revenue sources include equitable share from national government, grants and own revenue sources that financed the County budget.

Table 2.3: County Expenditure Analysis

Sector / Department	Actual allocation	Actual Expenditure	% Allocation
County Assembly	3,227,071,731.00	2,683,580,000.00	11
County Executive	4,639,620,000.00	4,949,570,000.00	16
Finance and Economic Planning	3,521,624,957.00	4,052,382,441.00	12
Agriculture Livestock & fisheries	2,492,860,708.00	1,622,880,602.00	8
County Public Service Board	267,555,000.00	259,974,791.00	1
Education, Skill Development, Youth & Sports	1,867,986,810.00	1,843,668,200.00	6
County Health Services	6,246,774,361.00	6,720,487,080.00	21
Administration Coordination & ICT	1,323,009,767.00	1,226,359,545.00	4
Energy Lands & Urban development	1,269,548,063.00	974,876,044.00	4
Roads and Public Service	1,660,568,398.00	1,688,796,478.00	6
Water Environment & Natural Resources	2,314,132,939.00	2,155,282,748.00	8
Trade Industry & Enterprise Development	552,119,796.00	494,112,218.00	2
Tourism, Culture & Social Services	519,117,500.00	406,388,590.00	2

2.3 Sector Programmes' Performance Review

This subsection provide sector performance trends in a narrative form and discusses the sector performance key outcomes (changes from baseline values at the end of CIDP implementation period) while highlighting outputs that has contributed to the changes. Therefore, this section provide key achievements by sector.

Agriculture, Livestock, and Fisheries Development

In crop production there was sharp reduction in crop production attributed to prolonged drought during the 2017-22 CIDP cycle. For maize the production was 1350MT in 2017 which declined to less than 13.5MT in 2022, beans production was 648MT in 2017 to 9MT in 2022 while vegetable production was 240 MT in 2017 declining to 80 metric tonnes in 2022. Out of post-harvest losses mitigation activities post-harvest losses declined from 48% to 25% of harvested produce in 2022. During the plan period, the sector's focus was to improve crop productivity, enhance food security, train farmers on new farming technologies, promote irrigation and improve the income levels and general economic well-being of the farmers. In meeting the above goals, the sector reached 8,500 farmers with certified drought tolerant crops seeds and 3,500 farmers using improved farm tools. Other achievements made include: a total of 3,450 hectares prepared using tractors, 192 acres of land under irrigation infrastructure.

In animal health management, interventions on vaccinations and provision of clinical services has contributed to reduction of disease related mortality from 20% in 2017 to 15% in 2022. Under livestock production increased access to marketing of live animals has increased market off take by 34% over the review period while milk production drastically declined by 44% from 3,8M Litres to 2.1M litres by 2022. Honey production sharply declined associated with prolonged drought declined from 11MT in 2019 to 1.3 MT in 2022. A total of 210,000 hay bales were produced and 1, 400 of breeding stock of Galla goats and 1,000 of indigenous chicken were procured and distributed. The county invested and put 80,000 acreage of rangeland under improved fodder/pasture production & grazing management. Six rangeland & grazing committees were formed, and six grazing plans & agreements developed, with six

grazing resources maps. A total of 210,000 hay bales were produced and 1, 400 of breeding stock of Galla goats and 1,000 of indigenous chicken were procured and distributed. A total of 7,000 farmers/groups accessed extension services. To boost honey production during the plan period, 20 apiaries were established and 25 beekeepers supported with honey production and harvesting equipment. A total of 1,500 value chain actors (VCA) were also trained on entrepreneurial skills, while 240 value chain actors trained and linked to markets. On livestock disease control, a total of 178,900 cattle were treated and 371,500 sheep, 784,300 goats, 14,500 poultry were treated respectively. 800 diagnostic kits were also procured.

To increase fisheries productivity, the county support production of 100MT of Fish production and in **Illeret & Loiyangalani** Wards and supported marketing of 350MT of dried fish. The sector invested in cold chain facilities, procurement and distribution of fishing equipment and gears towards enhancing the capacity of vulnerable households. 300 fisher folk underwent capacity building in form of training ranging from organizational management, laws and regulations governing the sector, fish value addition and marketing.

Water, Environment and Natural Resources Management

During the review period, the household return trekking distances within pastoral livelihood zones decreased from an average of 15-20km to 12.1km against a target of 5-10km. This decrease was attributed to drilling, equipping and rehabilitation of 80 boreholes, purchase and supply of 4050 rain water harvesting plastic tanks, construction, desilting and rehabilitation of 91 water pans, construction of 50 medium sized dams and 75 underground tanks. Other critical intervention included solarization of 56 major community water points and installation of prepaid water meters for 62 water kiosks.

Plate 2.1. Irrigated Vegetable garden at Kinisa

Plate 2.2. Flesh Fish at Loiyangalani Fish Cooperative

Plate 2.3. Sheep and Goats on sale at Merille Livestock Market

Plate 2.4. Bee apiary at Tesao ,Moyale

The proportion of population connected to piped water increased from 15% to 30% during the period. This is attributed to extension of 300 km of pipeline connecting water supply for 4,000 households in the major urban centres of Saku and Moyale.

County forest cover and tree cover stood at 1.7% and 2.06% respectively. During the review period 8ha of land is rehabilitated against target of 20ha.

To address inadequate climate resilience intervention to address recurring climate shocks the sector established Marsabit County Climate Change Policy 2019, Marsabit County Climate Change Fund Act 2020 (MCCCFA 2020) and set aside climate funds to fund climate resilience interventions, established and supported locally led structures (ward Climate Change Planning Committee as per MCCFA 2020). 12 ward climate changes planning committee and ward climate change resilience development plans and financing the plans to build adaptive capacity of local communities was achieved against the target of 20 wards. Mobilized of funds within County, National and International (under Marsabit Climate Change Fund At 2020) institutions to amount 72M was achieved against target of 156M yearly.

(photos)

Lands, Housing, Energy and Urban Development

To improve tenure security and to provide efficient & effective land administrative services the sector issued 2,995 title deeds against a target of 4,500 resulting in reduction of boundary disputes and further enhancing access to finance through use of title deeds as collateral.

A land registry at Marsabit County Head quarter was established as well as GIS lab and Marsabit Municipal to better service delivery.

Improved solid waste management by establishment of Twelve (12) more dump sites against a target of twenty (20) dumpsites leading to a clean environment.

To ensure access to renewable and affordable energy, the county established 3 mini-grids, as a result 400 households connected under subsidy programme. This has also led to improved economic activities in the rural setup by promoting businesses that rely on electricity e.g. salons and barber shops, butcheries and cold drinks shops among others.

To improve urban and town planning, the sector has developed 15 draft urban plans awaiting County Assembly approval.

Trade, Tourism, Industry And Cooperative Development

During the review period, the sector promoted enterprise growth and improved business environment . as a result, the sector issued 4200 permits in 2022 up from 3000 permits in 2017. The growth can be attributed to the construction of one mega modern market with a capacity of 500 stalls in Marsabit town. This has created an opportunity for the small scale traders to do business in a clean and conducive environment aggregated under one roof. In addition, capacity-building trainings was conducted for 1700 traders with a view of improving their entrepreneurial skills. In order to protect the consumers against exploitations by traders, 900 weight measures were verified as per KEBS standards.

To strengthen Cooperative movement, the number of new cooperatives established during the review period is 52 in 2017 against a target of 247 in 2022.

The tourism arrival in the County grew from 1,700 in 2017 to 3,000 in 2022. The County also realized increased bed capacity due to improved business opportunity in the hospitality sector. The bed capacity increased from 500 in 2017 to 1000 in 2022.

This is attributed to activation of more tourist circuits from 2 in 2017 to 4 in 2022. Increased participation in Tourism expos by the County also led to enhanced visibility and therefore improved visitation.

Plate 2.5. Shauri yako road

Roads, public works and transport

In order to improve road network: the sector, tarmacked 5 kilometers of roads; graveled 294 kilometers of existing unclassified roads; routinely maintained 1195 kilometers; opened 184 kilometers of new earth roads and 3 footbridges constructed, against a target of 23.8km,2,576km,1950km, 482km and 4 footbridges respectively., in addition the department designed, supervised and inspected 744 projects against 1000 projects.

Education, Skills Development, Youth and Sports

During the review period, ECDE enrolment increased from 19,075 in 2018 to 19,996 in 2021 but decreased to 18078 in 2021. Cumulative enrolment in ECDE was 95,587 (97%) against a target of 98,287 (100%). To improve learning conditions in the ECDEs, primary and post-primary education within the county, a total of 114 Classrooms were constructed/rehabilitated/completed and fully equipped against a target of 150, 13 ECDE centres were completed with fences against a target of 50. In addition, the Sector disbursed scholarship fund to 10,950 (90%) students over a period of 5 years against a target of 12,154. Teacher/learner ratio in ECDE centres improved from 1:82 to 1:44 against a target of 1:40.

To promote access to hands-on training among the youths, 955 youths were enrolled in Marsabit Youth Community Service Program (MY- CSP) – schools, hospitals, Youth Empowerment centres, environmental champions against a target of 1200. A total of 445 youth were trained on Computer Literacy Program (CLP) in VTCs & youth empowerment centres across the county against a target of 600. However, other talent search, development and scholarship in national academies were not realized by the end of the planning period.

The overall enrolment increased from 248 in 2017 to 625 in 2022. This is attributed to provision of free vocational training cumulatively benefiting 1500 students, construction of 14 workshops, 7 classrooms and 5 hostels in the 7 county VTCs compared to a target of 20, 8,

and 10 respectively, Procurement of assorted tools and equipment for all the 7 county VTCs, provision of start-up kits to 130 VTC graduates. The trainer/trainee ratio reduced from 1:7 to 1:17 against a target of 1:13.

Culture, Gender and Social Services

To promote, conserve and protect cultural heritage, the sector held 2 Marsabit Lake Turkana cultural festival against a target of five. In addition, 6 cultural heritage sites were mapped against a target of 3. 2 museums (desert museum/resource Centre and Dida Uran) were upgraded against the target 4

To promote quality services delivery and protect individual livelihoods and social wellbeings of the communities in the county, cash transfer support to 25,000 H/Hs against the previous 750 in collaborations with partners, 5,000 wheelchairs distributed against 3000 to Persons with Disabilities in enhancing mobility. Developed County social protection policy against the initial zero for enhancing services deliveries to the vulnerable categories. and Gender policies from the previous zero ,

To promote Gender Equality, 23 women groups trained against 10 on designs, supported with beads and other related materials under Ushangaa Kenya Initiative. 1080 Women, youth and PWDs trained on leadership, entrepreneurship, AGPO, lobby and advocacy skills against 360..

Health Services

The health sector envisions to provide quality, accessible, affordable health services to all residents of Marsabit county. Although doctor patient ratio has not improved overtime (1:13.000), Access and quality of health care services delivery improved due to mass Human Resource for Health recruitment and deployment carried out across all cadres. It increased from 545 to 1257 for all the cadres. Medical specialists increased from 1 to 10,

consequently this reduced referral of medical cases from 152 to 24 cases and maternal cases from 67 to 25 cases. Surgical cases reduced from 83 to 30 cases (2022)

Marsabit county is vast with a land mass of 70,960sq.km with health facilities placed at average of 100kms apart and to improve access to health services, the primary health care facilities increased from 95 to 140 and tertiary health facilities increased from 2 to 4 and equipped with modern facilities such as CT scan and special units such as functional renal units and blood bank

Improvement of RMNCAH indicators is one of the departmental priorities and with support of key stakeholders, the skilled Birth attendants improved from 37.6% to 69.0% and this was attributed to demand generation for services through Procurement and distribution of Mama kits, CBRA and transport advocacy, construction and equipping of maternity blocks which increased from 26 to 96.

Marsabit county is one of the counties with high burden of maternal mortality rate at 1127/100,000 (KDHS 2014).Facility based maternal mortality reduced from 12(2017) to 4(2022) and this was as a result of proved of quality service delivery, through infrastructural development, advocacy and demand generation, Integrated ,outreach services ,capacity building of Health care workers and strengthened referral services from the community, inter facilities and across the county.

Immunization coverage improved from 60.3% to 68% and this is a result of integrated outreach services in hard to areas of the county.

To strengthen community health services in the county, the Community Health units and Level 1 workforce (CHA) increased from 80 to 115 and 37 to 245 respectively.

The sanitation coverage increased from 32% to 42% as a result of implementation of CLTS activities in the county and this greatly reduced diarrheal related morbidities and mortalities.

Plate 2.6: Digital X-ray machine at MCRH

To provide equitable and affordable health care system, 2 ambulances procured, 1 modern maternal and child complex was operationalized and now serves over 30 patients per day, 9 modern Public Health Laboratory block completed, and 6 maternity wings renovated, 8 general wards constructed and equipped, 4 Fully functional Oxygen plant established, and 18 new maternity wings constructed. A total of 726 community health workers capacity were built in RMNCAH, 1,820 community referrals done. Although 8,200 mama kits were distributed during the plan period, this was 16.7% of the targeted number. Inadequate funding and withdrawal of partners due Covid-19 were cited as main reason. In addition, 2 Health Management Information System installed in 2 sub-county health facilities to boost health information dissemination, 127 health facilities were supplied with reporting tools and registers, 12,000 households were enrolled on NHIF programme and 1 satellite blood bank was constructed.

On Environmental Health Services (EHS), 8 incinerators were constructed, 46 toilets constructed and 7 burning chambers constructed. To boost adequate and timely supply of commodities and equipment, 127 health facilities are receiving KEMSA drugs and 127 health facilities are with functional cold chain equipment. Additionally, skilled labourers were employed to bridge the human resource gaps. A total of 662 technical and non-technical staff were employed and 53 health workers are benefiting from county scholarships.

County Public Service Board

To achieve enhanced service delivery, the sector recruited 1091 qualified and competent personnel during the year under review compared to 422 staff recruited during the first generation CIDP. This translates into 72% increase. Additionally, 751 staff who were mainly from department of health services were promoted. The sector also placed 800 staff on comprehensive medical cover provided by Takaful insurance and handled 4 disciplinary cases. In line with the goal of infrastructure development and support, the sector constructed 2 new office blocks and renovated 2 existing blocks.

Public Service and Administration

During the period under review, the sector was able to make strides in implementation of civic education forums from a target of 4000 to 10,000 meetings surpassing the target by 6,000.

The sector also recorded improved quality of public services implemented by both government and non-governmental sector. Coordination meetings increased from 10% at the initial baseline to 85% at the end of the year under review.

Mapping of conflict hot spot areas improved significantly as a result of using GIS technology from 10% to 40% at the end of the review. On conflict management and peace building there was tremendous reduction in cross

border skirmishes due to increased number of peace foras held from initial 2 meetings to 50 at the end of the year under review. The department also used innovative conflict resolution mechanisms like peace dividends that saw immense concession of conflict along the cross border through provision of 500 jikos and 200 motorbikes.

Other achievements made include improved access to information by people accessing County website from 120 to 1000 people according to ICT annual Departmental reports. Internet connectivity increased from initial headquarter connectivity to 10 Departments fully connected nevertheless Staff using official Government email decreased from 450 to 100 as a result of email migration by ICTA.

Office of the Governor

In 2018 the County piloted Performance Management system and mainstreamed performance contracting up to level three. By the end of the review period, the county average performance was at 71% against target of 100%. This was achieved through continuous staff capacity building, mentoring and facilitation.

Enhanced schools mobility and participation in extra-curriculum activities for the selected Public Schools through purchase of 4 school buses for Moyale Boys, North Horr Boys, Saku high and Mt. Kulal secondary school. Improved water access for vulnerable schools by purchase of water bowsers for water trucking during water crisis to enable school to utilize safe drinking water. Improved school infrastructure through construction of class rooms, kitchen, dining hall, library, and dormitory and administration blocks thus increased school enrolment.

Reduction of impact of disasters to people, properties and livelihoods through support by restocking livestock and relief food supplies to households

Finance and Economic Planning

To improve policy formulation and plans the sector developed various statutory planning documents including CIDP, ADP, CFSP, CBROP.

Own source revenue increased from 392,460,615 to 475,161,173 against a target of 605,000,000. To enhance revenue collection the sector developed automated revenue system and finance act, despite some level of efforts and investment the overall revenue realized during the plan period did not meet target which was attributed to the effects of covid-19, insecurity due to tribal clashes, political instability in the neighboring country of Ethiopia where the cross border trade was affected and severe drought that led to the loss of livestock and revenue leakages due to expansive porous border. The county did not create any new revenue base during the period under review.

The department improved budget absorption rate from 70 percent to 92 percent during the planned period under review.

During the period under review access to government procurement opportunities for (youth women, PLWD) was 32% against the provided 30% in the public procurement act .

The tracking of projects and programmes were improved through adoption of e-cimes, conducting routine M&E and development of annual development plans (APR).

County Assembly

To improve the business environment of the county & strengthen the capacity of MCAs to make laws and exercise oversight and representational functions, 1 modern and well-equipped chamber complete with a public gallery, 1 speaker's house built, xx bills published, and 2 vehicles were purchased.

2.4 Challenges

- The outbreak of Covid-19 pandemic during the implementation period slowed down the programme implementation
- Diminishing donor funded projects
- Late disbursement/non-disbursement of funds led to non-completion of some projects and activities & pending bills
- Insecurity and recurrent drought have hampered development implementation, market access by pastoralist and revenue growth.
- Low competitiveness of agriculture and livestock products/produce.
- Limited development funding to key sectors and few donor projects,
- Mismatch between varied programmes in CIDP and available resources that has led to low implementation rates,
- Low county revenue base and the equitable share allocation by the Commission on Revenue Allocation (CRA) does not match the county resource needs,
- Growing county wage bill had a negative impact on development, operation and maintenance of allocations,
- The vastness of the county and related coordination challenges,
- Poor infrastructure

2.5 Emerging issues

- Covid-19 and related restrictions to movement. This hindered overall project implementation and delivery of set outputs during the planning period
- Recurrent droughts.
- Slow process of adjudication and legalization of arable and communal land
- Emerging livestock diseases and slow pace of response

2.6 Lesson Learnt

Going forward, the county government shall initiate the following actions to fully achieve its aspirations.

- There is need for contingency plan for unforeseen emergencies that should be reviewed periodically to cater for emerging hazards, both health and economic,
- There is need to continue mobilizing more resources to cover the budget deficit to effectively coordinate towards drought response interventions and other emerging challenges,
- To address coordination challenges, strengthen the sub county CSG at the sub county level and strengthening sector technical working groups within the main CSG,

2.7 Natural Resource Assessment

This section discuss the major natural resources found within the county and this information is summarized in Table 2.4.

Table 2.4: Natural Resource Assessment

Name of Natural Resource*	Dependent Sectors	Status, Level of Utilization. Scenarios for Future	Opportunities for optimal utilization	Constraints to optimal utilization	Existing Sustainable Management strategies
Land and Land Based Resources	Land,	Land under farming 3% Grazing land 90% Land under urban settlement 7%	Optimal utilization of land and land-based resources	No proper land use planning policy	National land use planning
Renewable energy Resources e.g., Wind, Solar energy	Water, Health, Education, Agriculture, Lands, Energy and Urban Development	Under exploitation of the resources	Vast potential for utilization of the available renewable resources	Lack of capacity to develop/exploit available resources Lack of proper data bank and policy that guides the development	National energy policy
Arable land	Fisheries Tourism Agriculture Irrigation Livestock	Declining soil fertility - expected to further decline with expansion of impact of climate change Water quality expected to decline due to increased farming activities	Best practices in soil fertility management Soil /water Conservation Promotion of conservation agriculture Promotion of agro-forestry for soil nutrient recycling organic fertilizers	Human wildlife conflict Conflict with pastoralist Communal Land tenure discourages access to credit systems and long term development and investment	Zero tillage using herbicides Tree nurseries and planting Compost making and application Legal and policy enforcement Delineation of community land boundaries
Water resources	Irrigation	Water demand outstrips demand Competition with livestock needs - Quality is poor - Salinity- Traditional irrigation systems resulting in water wastage	Revamping irrigation delivery systems to upgrade to more water efficient systems	Inadequate funding to exploit irrigation potential Inadequate Capacity of Water Users committee	County Water Policy framework developed

2.8 Development issues

This section presents key sector development issues and their causes as identified during data collection and analysis stage. The summary of this information is provided in Table 2.5.

Table 2.5: Sector Development issues

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Agriculture, Livestock and Fisheries	Low crop productivity and output	<ul style="list-style-type: none"> Poor soil fertility and management practices Low adoption of technologies Weak private sector Low purchasing power of producers Low access to quality inputs Inadequate crop pests and disease surveillance and control High capital outlay for infrastructure development Low implementation of existing policies and legislation Inadequate crop baseline data Poor agronomic practices High post harvest losses Weak early warning agro-weather information management and dissemination 	<ul style="list-style-type: none"> Limited funding allocation to the sector Low Human Development Index Low literacy levels Weak research Extension Value chain Actors linkages Low Standard Precipitation Index-Insecurity Lack of spatial plans Land tenure High poverty levels 	<ul style="list-style-type: none"> Seeking alternative investments from donors and private sector investors Large water resources;- Partnership Promotion of flood water harvesting for crop and fodder production Expansive rangelands Fish farming in Oasis areas Diverse livelihoods Livestock fattening and branding Cross border trading Seed bulking for fodder grass and open pollinated crop varieties Political goodwill Existing physical infrastructure Ready markets Cross border trade
Agriculture, Livestock and Fisheries	Low livestock productivity and output	<ul style="list-style-type: none"> Low adoption of livestock development technologies Weak private sector participation in livestock development Low purchasing power of livestock producers Poor access to livestock and fodder quality inputs 	<ul style="list-style-type: none"> Limited funding allocation to the sector Low Human Development Index Low literacy levels Weak research Extension Value chain Actors linkages 	<ul style="list-style-type: none"> Seeking alternative investments from donors and private sector investors Large range resources; Strengthening partnership, collaboration and networks

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Agriculture, Livestock and Fisheries	Low livestock productivity and output	<ul style="list-style-type: none"> • Inadequate livestock disease surveillance and control • Low livestock vaccination coverage • Poor livestock disease management by producers • High capital outlay requirement for livestock infrastructure development • Low implementation of livestock related policies and regulation • Inadequate livestock baseline data • Poor rangeland governance • Poor animal husbandry practices • High cost of livestock inputs • Livestock pest and disease outbreaks • Inadequate livestock infrastructure • High livestock products post harvest losses • Weak early warning agro-weather information management and dissemination 	<ul style="list-style-type: none"> • Low Standard Precipitation Index • Insecurity • Lack of spatial plans • Land tenure • High poverty levels 	<ul style="list-style-type: none"> • Promotion of flood water harvesting for fodder production • Expansive rangelands • Diverse livelihoods • Livestock fattening and branding • Cross border trading • Seed bulking for fodder grass • Political goodwill • Existing physical infrastructure • High demand for livestock products
Agriculture, Livestock and Fisheries	Low fish production and output	<ul style="list-style-type: none"> • Low adoption of fishing technologies • Weak private sector participation in fisheries • Low purchasing power of fisherfolk • Poor access to quality fish inputs • Inadequate surveillance and control of fisheries resources • High capital outlay for fisheries processing infrastructure • Low enforcement of existing fisheries policies and regulation • Inadequate fisheries baseline data • Poor lake resources governance 	<ul style="list-style-type: none"> • Limited funding allocation to fisheries • Low Human Development Index • Low literacy levels • Weak research-extension- value chain Actors linkages • Insecurity • Lack of spatial plans • High poverty levels 	<ul style="list-style-type: none"> • Seeking alternative investments from donors and private sector investors • Large inland water body • -Strengthening Partnership, collaboration and networks • Support to fish traders outlets in major consumption areas

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Agriculture, Livestock and Fisheries	Low fish production and output	<ul style="list-style-type: none"> • Illegal fishing practices • High cost of fisheries inputs • Weak safety and rescue measures for fisherfolks • Inadequate fisheries infrastructure • High fish post harvest losses • Weak early warning agro-weather information management and dissemination 		<ul style="list-style-type: none"> • Diverse livelihoods • Cross border trading • Political goodwill • Existing physical infrastructure • Ready markets • Cross border trade
Water, Environment, and Natural Resources Management	Inadequate access to clean and safe drinking water	<ul style="list-style-type: none"> • Inadequate water infrastructure and systems development • Low connectivity to piped water • Poor rain water harvesting techniques • Low yields of water points 	<ul style="list-style-type: none"> • Inadequate financial allocations to development priorities • Logistical challenges Inadequate human resource capital 	<ul style="list-style-type: none"> • Water is among the key priorities in the Governor’s manifesto • Large number of partner supporting gaps in the WASH Sector • National Government support • Public-Private Partnership on innovation and technologies • Huge potential in green energy(solar and wind) • Operationalization of Marsabit County Water Service Fund which has also provided for the creation of Marsabit County Water Services Fund
	Inadequate water supply Loss of Biodiversity Climate change Land degradation Financing gap/delayed disbursement of county funds	<ul style="list-style-type: none"> • Recurrent drought; • Challenges with funds flow from the treasury 	<ul style="list-style-type: none"> • Inability to raise adequate local revenue to bridge funding gaps 	<ul style="list-style-type: none"> • Pursuing donor funding to support some project activities

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Water, Environment, and Natural Resources Management	<p>Inadequate water supply</p> <p>Loss of Biodiversity</p> <p>Climate change</p> <p>Land degradation</p> <p>Financing gap/delayed disbursement of county funds</p>	<ul style="list-style-type: none"> • Rangeland degradation due to over grazing • Illegal logging • Chacoal burning and over dependency of wood fuel • Recurring drought-Climate change • Invasive species-<i>Prosopis juliflora</i> • Water over abstraction 	<ul style="list-style-type: none"> • Poverty level hence over dependency on natural resources • High illiteracy level leading to low knowledge on environmental conservation and protection • Cultural practices that encourage clearing of trees/shrubs for fencing livestock (sorio/wedding ceremonies) • Inadequate funding to initiate environmental restoration, conservation, protection and management activities 	<ul style="list-style-type: none"> • Presence of partners to support environmental conservation activities • Rich culture that embrace environmental conservation and protection • National government support • County support • Allocation of 2% of development budget to climate change and environmental activities as stipulated in Marsabit County Climate Change Fund Act 2020 • Healthy environment promote healthy economy and people hence need to invest in environmental conservation, management and protection for common good/future generation
Water, Environment, and Natural Resources Management	<p>Inadequate climate resilience intervention</p>	<ul style="list-style-type: none"> • Recurring drought • Poor early warning dissemination and utilization • Inadequate preparedness plans • Rigidity to change to reality of climate change effect. • Policies, plans and legal framework not addressing current resilience and development needs in the face of climate change 	<ul style="list-style-type: none"> • Inadequate contingency funds to address climate shocks • Poor implementation of climate change resilience related policies, plans and legal framework 	<ul style="list-style-type: none"> • County, National and international funds to address climate shock through resilience interventions • Presence of local/indigenous knowledge to spearhead locally led actions to build their adaptive capacity

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Lands, Housing, Energy and Urban Development	Haphazard settlements	<ul style="list-style-type: none"> • Unplanned settlements 	<ul style="list-style-type: none"> • Communal land ownership • Inadequate finances 	<ul style="list-style-type: none"> • Availability of town boards and municipalities • Presence of Development partners • Planning for settlements beforehand
	Poor solid and liquid waste management	<ul style="list-style-type: none"> • Rapid urbanization • Absence of sewer lines • High cost of solid and liquid waste disposal services • Inadequate water supply 	<ul style="list-style-type: none"> • Inadequate finances • Insecurity 	<ul style="list-style-type: none"> • Engaging Development partners and NG in creation of sewer lines and proper solid waste management systems.
	Unreliable power supply in rural areas	<ul style="list-style-type: none"> • Sparse population 	<ul style="list-style-type: none"> • Pastoral-nomadism nature of the communities • Inadequate finances • Lack of minigrids 	<ul style="list-style-type: none"> • Reliable long hours of sunshine • Reliable wind strength and speed • Development partners
Lands, Housing, Energy and Urban Development	Inadequate housing	<ul style="list-style-type: none"> • High cost of construction materials 	<ul style="list-style-type: none"> • Inadequate finances 	<ul style="list-style-type: none"> • Presence of Development partners • Availability of land for development.
Trade, Tourism, Industry And Cooperative Development	Trade: Weak trade promotion and development	<ul style="list-style-type: none"> • Inadequate market structures & infrastructure To promote wholes & retail trade 	<ul style="list-style-type: none"> • Poor siting/locations of existing market structures across the county. • Lack data on business entities in trade • Lack of capacity of traders 	<ul style="list-style-type: none"> • Buying lands at the right location and building new markets while re-assigning existing structures for other trade promotion activities • Establish data base through surveys
		<ul style="list-style-type: none"> • Weak enforcement of trade policies for fair trade promotion and consumer protection 	<ul style="list-style-type: none"> • Lack of manpower to enforce those policies • Lack of enforcement of quality control policy • Porous border points 	<ul style="list-style-type: none"> • Strengthen the application of trade and investment policy • Enforcement of food safety & quality strategy • Upscale registration of border posts and improve surveillance

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Trade, Tourism, Industry And Cooperative Development	Trade: Weak trade promotion and development	• Breauecracies in ease of doing business	• Unstructured issuance of business permits and monitoring	• Register of existing business entity
		• Lack of access to finance	• Dormant CEF	• Reviving of CEF
		• Unfair trade practices and weak consumer protection	• Lack of fund for monitoring and supervision	• Liasion with KEBS & other relevant authorities
		• Lack of County PPP policy	• Lack of financing to develop the policy	• Development of County PPP policy
	Cooperative: Low registration rate of new cooperative societies	• Lengthy registration process at the national level	• Undevolved function of cooperative registration from national government to county government	• Establish office of county commissioner of cooperative through an act of CA and start registration of cooperatives at county level
		• Lack of Pre-Cooperative registration sensitization, formation and registration	• Lack of fund to under take the activities	• Create awareness on importance of cooperative societies.
		• Lack of consistent supervision, Inspection and Audits of cooperative societies	• Lack of funds to facilitate M&E activities	• Establishing robust M&E policy at department level
		• Inadequate SME's promotion and financing	• Lack of pool funds	• Linkages with financing organization
		• Inadeqaute market and financial linkages for SMEs and cooperatives	• Limited market informations	• Bench marking and market surveys
		Industrialization: Low uptake of cottage industries	• Inadequate promotion of cottage industries and industrial parks	• Lack of funding
	• Low competitiveness of locally produced products		• Product features • Number of sellers • Barriers to entry	• Unexploited value chains nodes
	Trade, Tourism, Industry And Cooperative Development	Industrialization: Low uptake of cottage industries	• Lack of Attraction of local and foreign direct investments.	• Lack of fund for promotional activities

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Trade, Tourism, Industry And Cooperative Development	Industrialization: Low uptake of cottage industries	• Lack of industrial sector policy development	• Lack of funds	• Support from partners
		• Incomplete County investment guide	• Lack of funds	• Support from partners
	Tourism: Low tourism numbers	• Inadequate tourism promotion and marketing • Low bed occupancy • Inadequate skills capacity	• Inadequate financing • Insecurity in the region • Poor road networks	• Partnership with stakeholders and seeking financial support from corporate bodies. • Existence of national Tourism Expos. • Diverse Tourism products and sites.
Roads, Public works and transport	Inadequate road network and transport infrastructure	• Inadequate access to hinterland. (opening up) • Inadequate motorable roads (bitumen standards) • Minimum maintenance of roads (grading and gravelling) • Inadequate transport infrastructure	• Vast nature of the County • Minimal or no project implementation. • Destruction caused natural disasters. Limited or lack budget. • Erosion of roads through disasters (floods)	• like KRB and EU – AFD and other development partners.
	Low building standards	• Not adhering to building codes.	• Poor quality of implemented projects	• Capacity building of staff by Governments.
Education, Skills Development, Youth and Sports	Inadequate access to quality VTC Education	• Mismatch of skills to job market; • Inadequate Infrastructure • Inadequate tools and equipment • Inadequate VTC Trainers • Negative attitude by community towards VTCs	• State low response to conflicts • Persistent draught /floods • Pandemic – COVID-19 • Inadequate staffing of instructors at the TVETs	• Availability of many development partners
	High un employment rate among Youth	• Lack of requisite work experience • Low access to start-up capital	• Youth not in control of wealth • Non inclusion of youth in developmental activities • Access to funds • Inadequate funding to MY-CSP	• Agribusiness • Cyber business • Establish county youth enterprise fund • Resourse mobilization from partners

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Education, Skills Development, Youth and Sports	Underdeveloped county sports leagues and tournament	<ul style="list-style-type: none"> Limited sporting facilities Lack of professional coaches in different fields Weak coordination of county sporting activities Lack of motivation of players in sports profession 	<ul style="list-style-type: none"> Inadequate resources for clubs and sports professions Absence of legal framework to support and coordinate sport activities 	<ul style="list-style-type: none"> Partnering with sports bodies, FKF, AAK, Safaricom to support sports Formulation of a sport policy to regulate and support county sports activities
Culture, Gender and Social Services	Weak culture and arts presevation	<ul style="list-style-type: none"> Inadequate cultural infrastructure. Retrogressive culture. Invasion of cultural sites 	<ul style="list-style-type: none"> Limited funding allocation to the sector. Bureaucracy 	<ul style="list-style-type: none"> Availability of willing donors and private sector investors,
		<ul style="list-style-type: none"> Recurrent conflict. Inadequate skills and knowledges 	<ul style="list-style-type: none"> Recurrent drought Westernization 	<ul style="list-style-type: none"> Availability of local human and material resources. Cultural diversity
	Gender inequality	<ul style="list-style-type: none"> Retrogressive culture Inadequate legal framework, Inadequate networking and Coordination.. Low enrolment of girls in schools 	<ul style="list-style-type: none"> Limited funding allocation to the sector. Bureaucracy 	<ul style="list-style-type: none"> Availability of willing donors and private sector investors,
	Inadequate access to social services	<ul style="list-style-type: none"> Recurrent drought Inadequate social support services Retrogressive culture Inadequate assistive devices for PWDs Inadequate social infrastructure Recurrent conflict. Inadequate legal framework. Inadequate networking and Coordination 	<ul style="list-style-type: none"> Limited funding allocation to the sector. Bureaucracy 	<ul style="list-style-type: none"> Availability of willing donors and private sector investors, Availability of local human and material resources.

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Health Services	Inadequate access to quality curative and rehabilitative services	<ul style="list-style-type: none"> • Inadequate capacity of emergency and referral services. • Erratic essential drugs and non-pharmaceutical supplies • Inadequate diagnostic services (Imaging, pathology, dental and laboratory services). • Inadequate specialized services (CTscan, renal units and eye units) • Inadequate rehabilitation services (palliative, hospice, physiotherapy and occupational therapy, drug • low capacity to deliver mental health services. • High prevalence of motorcycle accidents • Inadequate standard of quality of care • Low sanitation coverage in communities ,public places, and institutions and health care facilities. • High burden of malnutrition, TB, NTDs and NCDS 	<ul style="list-style-type: none"> • Inadequate finance • Centralized procurement • Nomadism and space population. • Poor road network • Delay in disbursement of funds from national /county government. • Inadequate capacity by the awarded contractors 	<ul style="list-style-type: none"> • Availability of well trained human resource for health for recruitment • Decentralized decision making for health with devolution . • Available supportive stakeholders / partners • Availability of policies and guidelines • political goodwill
	Inadequate access and utilisation of preventive and promotive health services	<ul style="list-style-type: none"> • High burden of malnutrition, TB, NTDs and NCDS • Low access and utilization of immunization and vaccination services. • Low standards of quality services, child health and nutrition intervention. • Inadequate focus on Newborn health at health facilities and communities. 	<ul style="list-style-type: none"> • Low health and nutrition literacy in the community • High Literacy and poverty level • Low budget allocation for preventive and promotive services • Inadequate implementation of adolescents and youth services. • Low demand generation for RMNCAH services • Inadequate resource allocation 	<ul style="list-style-type: none"> • Presence of community health volunteers • Supportive stakeholders and political goodwill. • Adequate Human resource trained • Good political will and coordinated partner support. • Available well trained human resource for health for recruitment • Well trained community health volunteers. • Well coordinated. partner support

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Health Services	Inadequate access and utilisation of preventive and promotive health services	<ul style="list-style-type: none"> • High level of malnutrition among and five ,pregnant and lactating mothers • Low uptake of level health services • Inadequate coverage of environmental, food vector and vernum, diseases surveillance, jigger control, school health • Inadequate access to safe and clean water. • Inadequate health facilities across the county. • Inadequate infrastructure for health • Inadequate HRH recruitment and deployment • Inadequate infrastructure for HMIS and ICT. • Inadequate specialized human resources for health. 	<ul style="list-style-type: none"> • High level of poverty and literacy level in the community. • stockout of commodities • Inadequate resource allocation and public participation • Inadequate water sources and supply of water treatment chemicals • Low budget allocation • Limited funds for development projects 	
	Inadequate administration and support services for health sector	<ul style="list-style-type: none"> • Weak human Resource Management (Deployment, distribution, capacity building, discipline) • Weak governance systems (Policies, legal frameworks, and SOPs, facility management and Oversight) • Weak HMIS (Health repository, ICT infrastructure, data production and use) 	<ul style="list-style-type: none"> • Weak collaboration and coordination across sectors 	<ul style="list-style-type: none"> • Capacity building and short term courses • Planning • Budget allocation and frameworks • Partnerships and multisectoral collaboration • Untapped revenue sources/streams

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Health Services	Inadequate administration and support services for health sector	<ul style="list-style-type: none"> • Inadequate drugs and non-pharmaceuticals in health facilities • Low coverage to health insurance • Inadequate supply and maintenance of medical equipment and Transport • Weak Monitoring and Evaluation unit • Low access to safe blood and blood products for transfusion • Limited infrastructure as per the requirements for the relevant health facilities categorization e.g. laboratories, maternity wings, operating theaters, general wards, incinerators 		<ul style="list-style-type: none"> • Health insurance • NHIF cover
County Public Service of Marsabit	Public service delivery	<ul style="list-style-type: none"> • Inadequate Offices structures • Inadequate logistical services public service • inadequate ICT infrastructure • low compliance with principles and values • Limited technical personell • Inadequate capacity of staff • Low staff Morale 	<ul style="list-style-type: none"> • Inadequate Finances 	<ul style="list-style-type: none"> • Availability of manpower in the job market • Availability of partners
Public Service and Administration	Access to public service	<ul style="list-style-type: none"> • Devolution structures not fully established i.e village administrative units and councils. 	<ul style="list-style-type: none"> • Highly politicized administrative units. • Capacity gaps. • Inadequate resource allocation. 	<ul style="list-style-type: none"> • Capacity support from partners. • Lobby and advocacy done through COG and FCDC
	Recurring Conflict and perennial drought	<ul style="list-style-type: none"> • Limited natural resources. • Disputed Boundaries. • Changes in climate patterns 	<ul style="list-style-type: none"> • Low understanding of communities on climate change. 	<ul style="list-style-type: none"> • Existence of climate change funds. • Existence of traditional conflict management mechanisms. • Supportive development partners • Support from constitutional commissions like NCIC and IEBC

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
Public Service and Administration	Public participation	<ul style="list-style-type: none"> Lack of appropriate legal frameworks to guide the process. Weak public and civic administration structures. 	<ul style="list-style-type: none"> Funding gaps Inadequate capacity Cultural factors High cost of radio airtime 	<ul style="list-style-type: none"> Availability of supportive partners. Use of public address systems and door to door visits. Partner sensitization on general human rights
	Low ICT connectivity	<ul style="list-style-type: none"> Vandalism of fibre optic cables. Inadequate ICT infrastructure Inadequate technical capacities of the work force. Inadequate human and technical capacity 	<ul style="list-style-type: none"> Low ICT skill levels in the county. Mismatch in technical skills. 	<ul style="list-style-type: none"> Availability of NOFBI traversing through the County enabling connectivity and communication. Use of County enforcement officers to relay messages on penalties of vandalism vice. Presence of partners and other actors who can compliment programs carried out by the Department.
Office of the Governor	Public Service delivery	<ul style="list-style-type: none"> Recurring conflicts Limited technical capacity Limited public infrastructures Oversight - Lack of social accountability framework Lack of village Administrative units Weak partnership collaboration coordination 	<ul style="list-style-type: none"> Political balkanization Porous borders Limited budget Cultural practice/ nomadism Natural hazards-Frequent drought High illiteracy level Vastness of the county Lack of policy framework and legislation 	<ul style="list-style-type: none"> Enabling environments- policies and legislation Partnerships with NGOs and Political good will Partnership MoU Institutions
Finance and Economic Planning	Low revenue collection	<ul style="list-style-type: none"> Inadequate revenue automation, few revenue streams Revenue leakages due to porous border Inadequate capacity of Revenue staff Resistance and default by the taxpayers 	<ul style="list-style-type: none"> Drought Insecurity 	<ul style="list-style-type: none"> Availability of development partners Vast natural resource eg sand harvesting.
Finance and Economic Planning	Weak policy and plans formulation	<ul style="list-style-type: none"> Inadequate capacity of staff. Lack of political good will. Weak baseline data 	<ul style="list-style-type: none"> Reallocation of funds due to competing needs 	<ul style="list-style-type: none"> Availability of Delopment partners Existence of technical staff. Availability of national plans and policies.

Sector	Development Issue	Cause(s)	Constraint(s)*	Opportunities**
	Poor coordination of projects and programmes	<ul style="list-style-type: none"> Weak M&E culture Poor political goodwill. 	<ul style="list-style-type: none"> Vastness of county Insecurity Extrime drought led to reallocation of funds. 	<ul style="list-style-type: none"> Existence of M&E focal persons. Adorption of e-CIMES. Availability of development partners.
	Low involvement of Youths, Women & PLWD in government business	<ul style="list-style-type: none"> Inadequate capacity of Youths, Women & PLWD in business 	<ul style="list-style-type: none"> Low literacy level 	<ul style="list-style-type: none"> High number of unemployed Youths, Women & PLWD Existence of PPOA Laws
County Assembly				

CHAPTER THREE: SPATIAL DEVELOPMENT FRAMEWORK

3.0 Introduction

This chapter provides the county Spatial framework to provide a medium-term guide for the county's development. The purpose of the framework is to show how development interventions will be done on space while taking into consideration the unique needs of the counties diverse population. The descriptin of this chapter was supposed to be based on the county spatial plan which is yet to be fully developed by the county. The section is therefore based o the variuos departmental information on the spatial distribution of resources and development interventions.

3.1 County Spatial Development Framework

The landscape of the County is endowed with enormous natural resources that has high potential for utility to promote growth and competitiveness. Among the key resource is the vast land mass, beautiful landscapes; renewable energy including wind and solar and strategic geographical location for cross border business and social cultural interactions.

Currently the county does not have the spatial plan but it is in the process of developing it.

Meanwhile an assessment of natural resources is being undertaken in consideration of thematic areas outlined in the National Spatial Plan 2015–2045, which establishes a broad physical planning framework that provides physical planning policies to support economic and sectoral planning. This is outlined in [Table 3.1](#) below.

Table 3.1: County Spatial Development Strategies by Thematic Areas

Thematic Areas	Overview/Current Status	Policy Strategy	Potential Geographical
Documenting the resources for potential growth areas	The County is endowed with vast natural resources, wildlife, scenic landscapes, rich cultural heritage, lake resource and large livestock population	Completion of the county spatial plan that includes resource map to guide sustainable management & utilization of natural resources; Increased income potential from resources such as lakes resources/fish production;	County Wide
Enhancing county competitiveness	The County is strategically located with international border point with Ethiopia thus giving great potential in trade. Potential for trade is further enhanced by the LAPSET project that connect the county to coastal Kenya and to Ethiopia making the county an international trade gateway for economic growth.	Completion of county Spatial Development Plan to guide development. Establishment of industrial parks along LAPSET corridor to spur economic development.	Qalaliwe
Modernizing Agriculture, Fisheries and Livestock	The county has limited potential for cultivated agriculture due to rainfall limitation and low value additions to agricultural products. Livestock is also greatly affected by persistence drought, rustling, low productivity and low market prices.	Prioritize provision of requisite infrastructure to support agriculture and livestock; Support livestock keeping through appropriate animal husbandry (e.g. improved extension services, research and disease control, product processing and timely marketing); Adoption of appropriate rangelands management practices for sustainable utilization of resources. Adoption of appropriate early warning systems for improved preparedness and response to frequent climatic hazards.	County wide

Thematic Areas	Overview/Current Status	Policy Strategy	Potential Geographical
Diversifying Tourism	The County is endowed with rich and diverse range of natural, social, human and physical capital, as well as cultural heritage and important archeological sites which provide incredible opportunity for economic potential through tourism.	<p>Planning and development of tourism circuit to offer safari and wildlife, filming ecotourism and adventure tourism;</p> <p>Improved transport infrastructure and upgrading tourism facilities along the circuits.</p> <p>Develop and implement aggressive marketing of the county as a major tourist destination;</p> <p>Develop niche products such as; conference tourism, eco-tourism, cultural tourism, sports tourism, bird watching and heritage and historic sites.</p>	County wide
Transportation Network	High costs of doing business, which impedes the growth of economic activities.	Increase financial resources for road construction and maintenance; construct new roads; expand and maintain existing roads;	County wide
Conserving the Natural Environment	<p>Involve and empower communities in the management of county ecosystems and promote environmental education and awareness;</p> <p>Improve capacity for adaptation to global climatic change. Promote efficient adaptation measures for productive and sustainable resource management in the county.</p> <p>Mainstream climate change into all county development plans and policies. Develop and promote the use of green energy.</p>	<p>Policy formulation aimed at improving involve and empower communities in the management of county ecosystems and promote environmental education and awareness;</p> <p>Improve capacity for adaptation to global climatic change. Promote efficient adaptation measures for productive and sustainable resource management in the county. Mainstream climate change into all county development plans and policies.</p> <p>Develop and promote the use of green energy.</p>	County wide

Thematic Areas	Overview/Current Status	Policy Strategy	Potential Geographical
Managing Human Settlements	The county settlement patterns are highly dispersed and scattered. The patterns are influenced by water accessibility, pastures, production potential, security, accessibility and other social services. The dispersed nature of these patterns therefore leads to high cost of provision of infrastructure facilities and social services.	<p>Involve and empower communities in the management of county ecosystems & promote environmental education & awareness;</p> <p>Improve capacity for adaptation to global climatic change. Promote efficient adaptation measures for productive and sustainable resource management in the county.</p> <p>Mainstream climate change into all county development plans and policies.</p> <p>Develop and promote the use of green energy.</p>	County wide
Appropriate Infrastructure	The Great North Road has a great impact on the economic development; The LAPSET Project, which runs from Lamu Port through Marsabit County and into southern.	Collaborate with national government and development partners to develop infrastructure.	Along the LAPSET corridor
Industrialization	The County has large livestock population, high tourism potential and few agro products that not fully tapped. Poor linkages to the markets due to poor infrastructures and lack of key industries on value addition is the biggest challenge	<p>Establish the industrial zones with supporting infrastructures (water, electricity, road network) especially along LAPPSET Corridor;</p> <p>Complete abattoir and establish complementary industries Promote the formation of cooperatives and SACCOS to advance marketing of county products.</p>	County wide

The County is served by the proposed major infrastructure project such as LAPSET and the national fiber optic network. The LAPSET Corridor Program is Eastern Africa's largest and most ambitious infrastructure project bringing together Kenya, Ethiopia and South Sudan. This mega project consists of seven key infrastructure projects starting with a new 32 Berth port at Lamu (Kenya); Interregional Highways from Lamu to Isiolo, Isiolo to Juba (South Sudan), Isiolo to Addis Ababa (Ethiopia), and Lamu to Garsen (Kenya), Crude Oil Pipeline from Lamu to Isiolo, Isiolo to Juba; Product Oil Pipeline from Lamu to Isiolo, Isiolo to Addis Ababa; Interregional Standard Gauge Railway lines from Lamu to Isiolo, Isiolo to Juba, Isiolo to Addis Ababa, and Nairobi to Isiolo; 3 International Airports:

The LAPSSET Corridor Highways connect Lamu Port to landlocked Ethiopia and South Sudan, enabling movement of people and cargo, interconnecting the region, spurring regional trade and economic development. This is shown by figure 3.1.

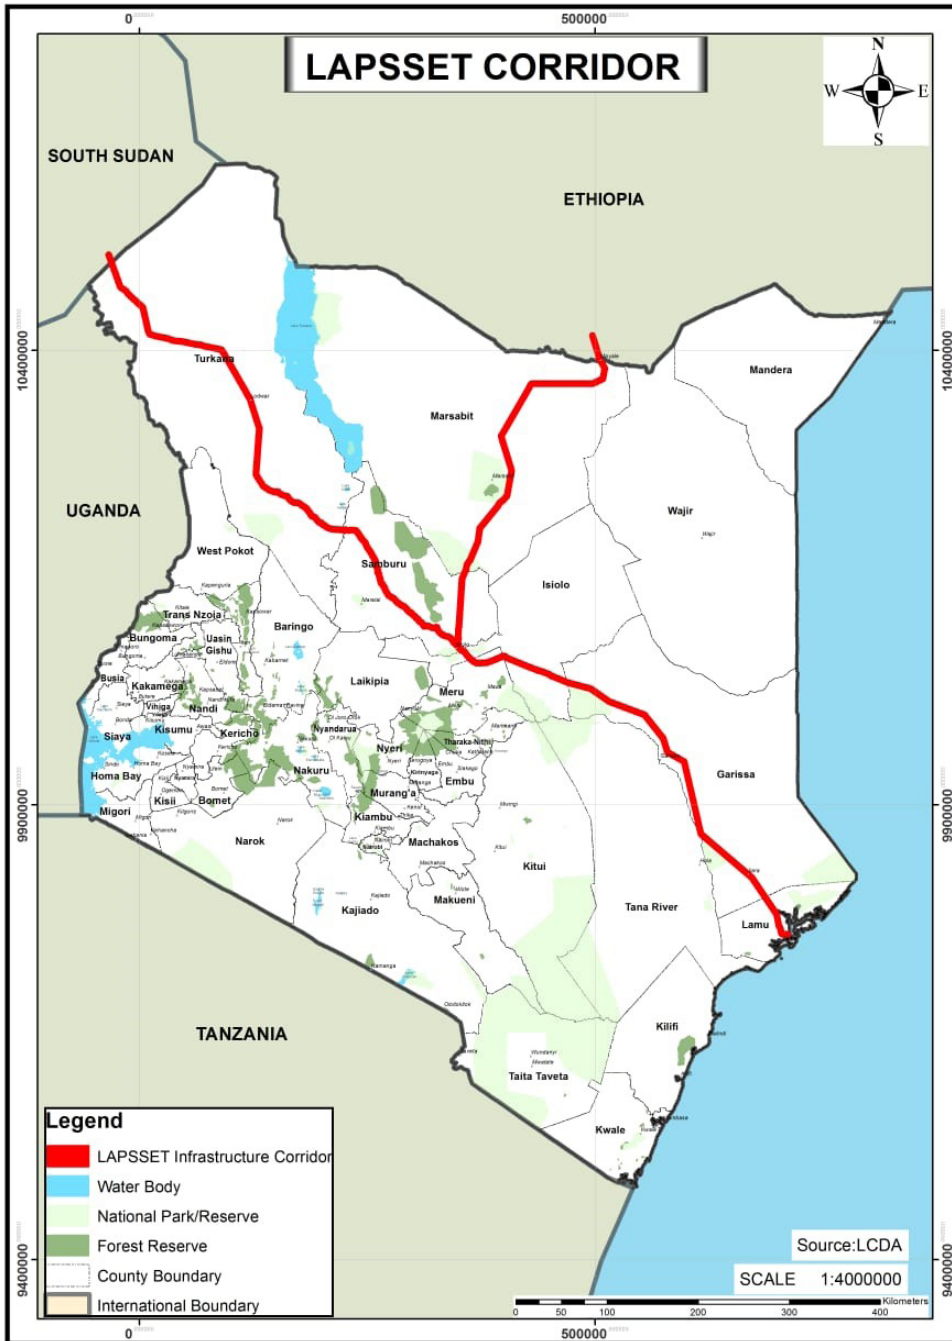

Figure 3.1: Lapset corridor map passing through the vast Marsabit County

Spatial distribution of County Livelihoods

The majority of the county residents practice pastoralism producing mainly cattle, camels, goats and sheep. The livestock economy is the main income earner for the households and the county at large. The communities continue utilizing mobility as their main livestock production strategies. While the livestock is kept mobile with herders the households mainly remain stationary. Except for few pockets where some small rainfed agriculture is practiced occasionally the larger land mass of the county is only suitable for livestock production. However the potentials for producing the different livestock species varies across the county and these needs to be mapped out such as relevant services that are specific to the livestock species can best be planned out. Additionally other resources related to livestock production that include veterinary, livestock markets, water for livestock and other related services need to be equally mapped out to visualize the extent of coverage and to establish areas of gaps. The settlement patterns in the county is highly dispersed and scattered. The patterns are influenced by water accessibility, production potential, accessibility and security. The spatial distribution of livelihoods are demonstrated by [figure 3.2](#).

Figure 3.2: Showing spatial distribution of Livelihoods in the county

Status of Water Resources

The county residents are served by different water sources. The largest water body is lake Turkana which runs along the western border with Turkana county. The lake mainly used of fishing provides drinking water for livestock as well. The main water sources are water pans and boreholes that are generally sparsely distributed in the county. Most water points are found to the North Eastern parts specifically around Sololo and Dabel areas where settlements are closer together. Borehole are critical water sources during the dry season. Having the water sources mapped out with details of the status, quality, repair needs and yield is important to monitor water supplies and needs of the population. Also development of water sources need to be coupled with

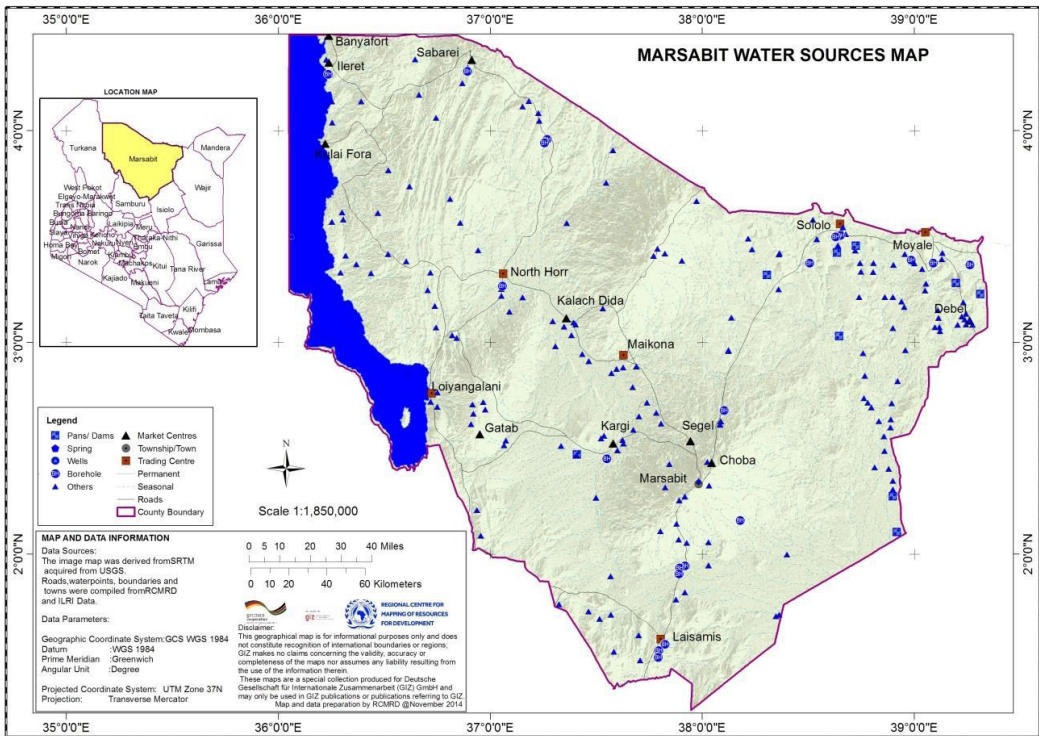

Figure 3.3: Marsabit water resource distribution.

Spatial distribution of health facilities in the county

Health centers across our county have years of history providing care in underserved communities for everyone, regardless of their ability to pay courtesy of Universal health care coverage. By design, these health centers are run by healthcare professionals ensuring the care delivered is tailored for the needs of the communities they serve. The distribution of the major health services are in major centers which leaves the larger population in the sparsely distributed settlements with limited access to health services. The poor road infrastructure makes it challenging for adequate distribution of health resources.

Figure 3.4: Distribution of Health Facilities in the county

While the above are a few examples of spatial distribution of counties services and facilities, there is need to update the available data base and maintain a live spatial framework to countinously guide development in the county. Each department need to collect data and keep up to date spatial framewotj which will contribute to the completion of the county's spatial plan.

CHAPTER 4: DEVELOPMENT PRIORITIES, STRATEGIES AND PROGRAMMES

This section provides a summary of the development priorities identified in the sectors from the public participation forums, Sectoral forums, stakeholder’s forums, MTP IV, Bottom-Up Economic Transformation Agenda (BETA), County government Transformative Agenda among others.

4.1 Development Priorities and Strategies

Table 4.1: Sector Priorities and Strategies

Sector Priorities	Strategies
Agriculture, Livestock & Fisheries Development Sector	
Increase crop productivity and output	<ul style="list-style-type: none"> • Create a conducive environment for private sector investment in crop production • Support to vulnerable households • Strengthen crop pest and disease surveillance and control • Strengthen policy and regulation implementation • Support crop production census • Promotion of agribusiness and value addition • Strengthen crop agriculture information management systems • Promotion of Climate smart Agriculture • Mainstreaming climate adaptation and mitigation in crop production

Sector Priorities	Strategies
Increase livestock productivity and output	<ul style="list-style-type: none"> • Promotion of appropriate livestock production and health technologies • Create a conducive environment for private sector investment in livestock • Support to vulnerable households • Strengthen livestock pest and disease surveillance and control • Strengthen policy and regulation implementation • Support County livestock census • Strengthen range resource management and governance • Strengthening livestock marketing systems • Promotion of livestock agri-business and value addition. • Promotion of Climate smart Agriculture in livestock • Mainstreaming climate adaptation and mitigation in livestock • Strengthen veterinary public health and zoonosis management • Strengthen Livestock sub sector coordination
Increase fish production and output	<ul style="list-style-type: none"> • Create a conducive environment for private sector investment in fisheries • Support to vulnerable fisheries households • Strengthen lake resource use surveillance and control • Strengthen policy and regulation implementation • Support fisheries resources survey • Strengthen lake resource management and governance • Support agribusiness and value addition • Promotion of Climate adaptation measures in fisheries • Strengthen Fisheries sub sector coordination • Diversification of fish products

Water, Environment and Natural Resources Sector

<ul style="list-style-type: none"> • Enhancing availability and access to potable water 	<ul style="list-style-type: none"> • Development of water infrastructure and system • Increase adoption of innovation, technologies and system strengthening support • Drought emergency response intervention approaches
<ul style="list-style-type: none"> • Reduce environmental degradation through conservation, protecting and managing of environment for present and future generation 	<ul style="list-style-type: none"> • Conserve, manage and conserve environment for common good • Initiate landscape restoration initiatives for sustainable livelihoods • Rehabilitate degraded rangelands • Develop community led environmental/climate change education awareness strategies • Manage, control and clear invasive species (Prosopi Juliflora) • Establish community conservancies as sustainable land
<ul style="list-style-type: none"> • Increase adaptive capacity/ build community resilience of communities to withstand climate shocks 	<ul style="list-style-type: none"> • Provide legal and policy framework geared toward resilience building • Conduct County participatory climate risk assessment to inform climate reliance interventions • Allocate 2% of the development budge to climate change adaptation, resilience and mitigation (as per Marsabit Climate Change Fund Act 2020) and outsource funds from national and international climate change funds (National climate change fund, Adaptation fund, Green climate fund, Global Environmental Facility, Carbon Credit among others) • Develop climate finance framework to guide climate change adaptation and mitigation • Initiate locally led climate change resilience programs and projects (mega projects for irrigation, exploration natural resources among others investment) to increase adaptive capacity • Form and train ward development committees as climate change champions, facilitate development of ward climate change resilience plans and financing the actions • Increase effectiveness of early warning information formulation, dissemination, utilization and feedback to promote provision of EW information for early action to reduce losses

Sector Priorities	Strategies
Lands Energy, Housing & Urban Development Sector	
<ul style="list-style-type: none"> Improve Management and administration of land 	<ul style="list-style-type: none"> Surveying and planning for markets Enforce strict adherence to approved development plans. Develop County Spatial Plan
<ul style="list-style-type: none"> Improve solid and liquid waste management 	<ul style="list-style-type: none"> Enhance Proper management of waste Develop recreational parks in Urban Centers Develop and Maintain storm water drainage ways Develop modern waste collection system. Develop fully fledged fire stations in all Sub-County Headquarters Establishment of towns and municipalities
<ul style="list-style-type: none"> Improve access to affordable, reliable, secure and climate friendly energy services 	<ul style="list-style-type: none"> Develop Energy policy and Renewable Energy Master Plan Develop green energy sources within the under served areas
<ul style="list-style-type: none"> Improve housing infrastructure 	<ul style="list-style-type: none"> Enhance investment in developing low cost housing Provide incentives to real estate developers
Trade, Tourism, Industry & Cooperative Development Sector	
<ul style="list-style-type: none"> Trade promotion and development 	<ul style="list-style-type: none"> Development of market infrastructure (establish border post) Development and Strengthening enforcement policies and regulations Automation of single business permits and establishing business development centre Enhancing access to finance Development of PPP policy & Investor guide
<ul style="list-style-type: none"> Cooperative societies registration and development 	<ul style="list-style-type: none"> Sensitization, formation and registration of Cooperative societies Development of annual Cooperative supervision, Inspection and Audits plan Development of market information systems and financial linkages for SMEs and cooperatives societies Development and strengthening of cooperative policy.
<ul style="list-style-type: none"> Cottage industries and industrial parks development and promotion 	<ul style="list-style-type: none"> Establishment of cottage industries and incubation centre's Establishment industrial park Promotion of aggregation and value addition for local products Establishment of annual trade fair and investment forums Development and strengthening of industrial sector policy
<ul style="list-style-type: none"> Tourism promotion and development 	<ul style="list-style-type: none"> Development of county tourism facilities Trainings and sensitization of local hoteliers on market demands Development of desert and water based tourism products & recreation sites Establishment of Tourism Information centers
Roads, Public Works & Transport Sector	
Improving road network infrastructure	Expansion of road infrastructure (Opening up of new roads, Upgrading of roads to bitumen standards, Maintenance of roads (grading and gravelling Construction of airstrips and bus parks).
Improving transport mobility	Maintenance and equipping of transport infrastructures (procurement of new machineries, maintenance of existing machineries, construction and equipping of modern workshops and water transport safety and efficiency).
Improving access to quality ECD Education	<ul style="list-style-type: none"> Invest in ECDE infrastructure and learning aids Enhance coordination and allocation towards ECDE feeding program Enhance human resource capacity
Improving access to quality technical and vocational training	<ul style="list-style-type: none"> Enhance and review curriculum to align to market demand Invest in VTC infrastructure, tools, and equipment Enhance human resource capacity Community sensitization on VTCs

Sector Priorities	Strategies
Reduce unemployment rate among Youth	<ul style="list-style-type: none"> Enhance capacity of internship program (MY-CSP) Establish county youth enterprise fund Enhance coordination amongst stakeholders (county, YEF, CSOs, Uwezo & hustler fund) Mainstreaming of youth intervention in all departments
Develop county sports leagues and tournaments	<ul style="list-style-type: none"> Investment in sporting facilities' Enhance coordination of relevant sports stakeholders Enhance resource mobilization and partnership'
Improving, promoting, preserving and celebrating the county cultural heritage	<p>Enhancing access to cultural infrastructure</p> <p>Enhancing awareness campaigns against retrogressive culture</p> <p>Strengthening protection of sacred and cultural sites</p> <p>Enhancing cultural festivals celebrations across the County for peaceful coexistence</p> <p>Strengthening documentation of indigenous knowledge for livelihoods diversification</p>
Promoting gender equality	<p>Enhance awareness campaigns against retrogressive culture</p> <p>Strengthening legal framework</p> <p>Enhance networking and coordination of stakeholders in the County</p> <p>Enhance enrolment of girls and boys in schools</p> <p>Strengthening capacity of women, men ,youth and staff on gender mainstreaming</p>
Increasing access to social services	<p>Enhance awareness campaigns against retrogressive culture</p> <p>Strengthening legal framework of social services</p> <p>Enhance networking and Coordination of stakeholders in the County</p> <p>Enhancing access to social services infrastructure</p> <p>Enhance mobility of PWDs</p> <p>Strengthen social support services in the County</p>
Health Services Sector	
Improving access to quality curative and rehabilitative services.	Enhance capacity to provide Emergency and referral services
	Enhance regular supply of drugs , commodities and products
	Enhance diagnostic and imaging health services
	Development and operationalization of the health policies and guidelines.
	Establishment of special services and capacity building of health care workers
	Strengthen rehabilitative and mental health services
Improving access and utilisation of preventive and promotive health services.	Improve management of Non communicable diseases
	Implementation of RMNCAH programme.
	Enhance Immunisation services.
	Implementation of Community led total sanitation and School health programme.
	Implementation of community health strategy policy.
	Implementation of High Impact Nutrition Intervention packages across the county.
	Enhanced UHC
	Strengthen Disease surveillance services
	Implementation of WASH
	Enhance quality of HIV care and treatment services
	Advocacy for program based budgeting.
Enhance administration support services for health sector	Development of program score cards and utilisation.
	Capacity building of health works and continue medical education
	Strengthen collaboration and coordination across sectors
	Utilization of all untapped revenue sources/streams, FIF, NHIF and other insurance companies.

Sector Priorities	Strategies
	Strengthen infrastructure as per the requirements for the relevant health facilities categorization e.g. laboratories, maternity wings, operating theatres, general ward, incinerators
	Allocate resources for recruitment and deployment of health work force

County Public Service Board Sector

Enhancing Public Service Delivery	<ul style="list-style-type: none"> Enhancing Human Resource Capacity Development Promotion of Principles and Values of Public Service Human Resource Planning and Policy Development
-----------------------------------	---

Public Service and Administration Sector

Public service delivery systems and coordination of county affairs	Fast track enactment of village administration act. Identify service gaps and overlaps and communicate to relevant offices for timely interventions.
Public participation and civic education	Enhance awareness of Government services and operations to the members of the public and county staff. Enhance accountability in service delivery. Establishment of relevant policies and legal frameworks to guide public participation and civic education. Improve sensitization, awareness creation and advocacy.
Integration, peace building and disaster management	Put in place relevant policies and legal frameworks that promotes peace and cohesion. Promote peace building initiatives among wearying communities Promote peaceful coexistence between communities.
Provision of ICT support services	Support establishment of a robust ICT infrastructure.
Strategic Communications and Public Relations	Increase awareness of Government services and operations by internal and external audience.

Office of the Governor Sector

Improving public service delivery	Strengthen Peace building initiative Mainstream social transparency and accountability Improve access to public infrastructure Strengthen partnership collaboration and coordination
-----------------------------------	---

Finance and Economic Planning Sector

Improve revenue generation capacity	<ul style="list-style-type: none"> Automate revenue collection and management system. Expand revenue base. Establish revenue collection barriers at the main border points. Enhance capacity of revenue staff Conducting tax payer education and revenue conferences
Enhance policy and plans formulation	<ul style="list-style-type: none"> Enhance capacity of planning staff Enhance capacity of top level leadership Develop county statistical abstract Improve tracking of projects and programmes Undertake routine monitoring and evaluation of projects Enhance capacity of executive and technical Staff
Improve involvement of Youths, Women & PLWD in government business	<ul style="list-style-type: none"> Enhance capacity of Youths, Women & PLWD in business

County Assembly Sector

Enhancing Public Service Delivery	<ul style="list-style-type: none"> Improve legislative ability and oversight role of assembly members Improve work environment for the county assembly members and staff Improve efficiency in delivery of information and application of technology
-----------------------------------	---

4.1.1 Agriculture, Livestock and Fisheries Development Sector

The sector comprises of agriculture, fisheries, veterinary services, and livestock production sub sectors.

Vision: "To be the leading agent towards the achievement of food security for all, employment creation, income generation and poverty reduction in Marsabit County".

Mission: "To improve the livelihoods of Marsabit people through by promoting competitive agriculture, sustainable crop, livestock and fisheries development, innovative research and technologies, equitable distribution and sustainable management of natural resources

The strategic objective of the sector:

- Creating an enabling environment for agricultural development through review of the current legal and policy framework;
- Promoting market and product development by adopting a value chain approach;
- Facilitate increased livestock, fisheries, agricultural productivity and outputs through improved extension, advisory support services and technology application;
- Promote conservation and protection of the environment and natural resources through sustainable land use practices;
- Strengthen access to agricultural and livestock information through ICT-based information management systems;
- Facilitate accessibility of affordable credit, insurance and quality inputs to farmers; fisher folks, pastoralist,
- Strengthen human resources development, including monitoring and evaluation (M&E) and coordination of staff functions within the Department.
- Strengthen crop and livestock pest and disease control management
- Strengthen veterinary public health, quality assurance and control of zoonotic disease

4.2 Sector Programmes and Flagship Projects

This section provide sector programmes and flagship projects to be implemented within the planned period as presented in tables 4.2 and 4.3 respectively.

4.2.1 Sector Programmes

The section provides sector programmes to be implemented within the planned period. This information are presented in a tabular form below.

Table 4.2: Agriculture, Livestock & Fisheries Development Sector Programmes

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh.M)
					Year 1		Year 2		Year 3		Year 4		Year 5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Crop agriculture policy and regulation	Policy and regulations formulated	No of Policy in place	2.3	0	1	3	0	0	1	2	1	3	0	0	8
	No of legislation			0	1	3	0	0	1	2.5	1	3	0	0	8.5
Crop husbandry extension services	Agricultural extension and advisory services strengthened	No of farmers reached	2.3	3500	1200	3	1200	3	1200	3	1200	3	1200	3	15
	Staff capacity to offer technical services to farmers and stakeholders Strengthened	Number of staff trained	2.3	28	14	8.4	18	10.8	24	14.8	36	21.6	8	4.8	60.4
	farmers' capacity to offer technical services to farmers and stakeholders Strengthened	Number of farmers trained	2.3	1325	1600	6.4	1600	6.4	1800	13.5	1800	13.5	800	8.0	47.8

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh.M)
					Year 1		Year 2		Year 3		Year 4		Year 5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Crop husbandry extension services	farmers' capacity to offer technical services to farmers and stakeholders	Number of tractors with ploughs bought	2.3	12	2	15	2	15	2	15	1	7.5	1	7.5	60
	Strengthened	No of farmers utilizing improved farm tools	2.3	800	300	13.6	300	13.6	300	13.6	300	13.6	300	13.6	68
	Vulnerable farmers capacity to undertake crop production improved	No of vulnerable farmers supported with inputs	2.3	625	150	8	150	8	150	8	150	8	150	8	40
Crop pests and diseases management	Periodic reporting on surveillance of crop pests and diseases enhanced	Monthly reports, seasonal reports, ad hoc reports	2.3	46	14	0.3	14	0.3	14	0.3	14	0.3	14	0.3	1.5
	Diagnosis of crop pest and diseases capacity enhanced	No of analysis, identification report	2.3	5	4	0.2	4	0.2	4	0.2	4	0.2	4	0.2	1
	County preparedness and response for pests and diseases control enhanced	No of County pest and disease outbreak control contingency plans implemented	2.3	1	2	6	2	6	2	7.5	2	7.5	2	3.5	30.5

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh.M)
					Year 1		Year 2		Year 3		Year 4		Year 5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Crop pests and diseases management	Climate smart technologies for crops production promoted	No of climate smart technologies promoted	2.3	4	6	3.6	6	3.6	6	3.6	6	3.6	6	3.6	18
	Agri-nutrition activities promoted	No of preparation and utilization demonstration on non-traditional food conducted	2.1	62	80	8	80	8	82	8.2	90	9	120	12	45.2
	Agricultural information accessibility strengthened	Monthly report on available food stock, market prices stability and crops performances	2.3	4	12	1	12	1	12	1	12	1	12	1	5
	Soil and water conservation structures established	No of conservation structures established in meters	2.4	250	10,000	6	11,000	6	12,000	7	13,000	7	14,000	8	34
Climate resilient agriculture	water harvesting for agriculture production constructed	No of water harvesting structures adopted	2.4	2	10	4	10	4	10	4	10	4	10	4	20
	Climate resilient technologies adoption enhanced	No of farmers benefitting from technologies	2.4	3600	150	1	150	1	150	1	150	1	150	1	5

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh.M)
					Year 1		Year 2		Year 3		Year 4		Year 5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Climate resilient agriculture	villages and wards CCA/DRR Committees strengthened	No of villages and wards CCA/DRR Committees strengthened	2.4	12	20	3	20	4	20	5	20	6	20	6	24
	Agroforestry practices promoted	No. of acres under agroforestry	2.4	12	15	4	20	7	30	12	15	8	16	8	39
Agribusiness and value addition	survey and mapping for priority value chains conducted	No of priority value chain surveyed and mapped	2.3	3	5	2	5	2	5	2	5	2	5	2	10
	market survey for priority value chains conducted	No of market survey conducted	2.3	2	2	8	2	8	2	8	2	8	2	8	40
	Farmer producer organization and linkages to niche market strengthened	No of Farmer Producer Organisations linked to niche markets	2.3	2	16	3	16	3	16	3	16	3	16	3	15
	Reduced crop and post-harvest losses	Percentage reduction in losses in field and post-harvest level	2.3	55	5	4	5	4	5	5	10	6	5	4	23
	Value chain actors training conducted	No of training reports, curriculum developed	2.3	3	5	30	5	30	5	30	5	30	5	30	150

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh.M)
					Year 1		Year 2		Year 3		Year 4		Year 5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Agribusiness and value addition	Farm management plan for crop value chains developed	No of farm management guidelines developed	2.3	0	1	1.5	1	1.5	1	1.5	1	1.5	1	1.5	7.5
Support to Agriculture Sector Coordination	County Agriculture Sector Committee activities supported	No of County Agriculture Sector Steering Committee meetings	17	4	4	1.5	4	2.0	4	2.0	4	2.0	4	2.5	10
	Value Chain Platforms supported	No. of Value chains platforms convened and supported	17	4	6	2	8	2.5	8	3.5	8	3.5	10	4.5	16
	Stakeholders meeting Held	Number Of Agriculture Stakeholders engagement fora	17	2	4	1	4	1.2	4	1.2	4	1.2	4	1.2	4.8

4.1.2 Water, Environment and Natural Resources Sector

Sector composition: There are two sectors in this Department whose mandates are as follows:

- i. Water Services-Provision of potable water for both people and their livestock
- ii. Environment and Climate Change - Ensuring environmental conservation and protection/management of natural resources for cleaner environment for all, and resilience building to increase adaptive capacity of local communities

Vision and Mission: Provide sector Vision and Mission

Vision: To provide an enabling environment to access safe water and sanitation services in clean, secure and sustainably managed environment

Mission: To effectively promote, protect, provide, monitor and sustainably manage the environment and natural resources for provision of safe water services in a clean and sustainably and secure environment

Sector Goal(s):

- To provide sufficient portable water in a well conserved environment
- To Enhance resilience of water resources systems to climate change impacts through sustainable water resource management
- To build resilience adaptive capacity of the communities
- To conserve and protect environment to continuously provide environmental goods

Table 4.3: Water, Environment and Natural Resources Sector Programmes

4.1.3 Lands Energy, Housing & Urban Development Sector

Vision: “Excellent land management and vibrant, well planned, urban centres and world class cost effective renewable energy infrastructure in Marsabit County.”

Mission: “To facilitate and enable sustainable land use and growth of the urban centres through efficient land administration, equitable access, secure tenure, sustainable management of land-based resource and wellplanned urban centres and promotion of clean, green, efficient and affordable renewable energy.”

Sector composition

This sector comprises of

- Physical Planning
- Urban Development and Management
- Land Survey and Geo Informatics
- Energy
- Municipalities and Town Administration

Sector Goal (s):

- Security of land tenure system achieved
- Harnessing of clean, green, efficient, cost effective and sustainable available renewable resources
- Safety and security of housing and urban sub sector

Table 4.4: Lands Energy, Housing & Urban Development Sector Programmes

4.1.5 Roads, Public Works & Transport Sectors Sector

4.1.5.1 The department

The department comprises the following sectors: -

- Roads and Transport
- Public works

4.1.5.2 Sector Vision and Mission

Vision: "To be the leading department committed to provision of effective and efficient services to achieve a cohesive and a prosperous County.

Mission: "To provide technical support for all public works that enhances sustainable development, socio-economic growth, and prosperity.

Sector goals

The department consists of three sections, namely; Roads, Transport and Public works each with distinct functions;

Roads

- Design and construction of new roads within the county;
- Maintenance of both rural and urban roads within the county;
- Protection of county road reserves.

Transport

- Suitability test for drivers
- Inspection of Motor vehicles

Public works

- Designing, documenting and supervising all Government building works and footbridges;
- Keeping and maintaining inventory of Government buildings.

4.1.6 Flagship Projects

The section summarizes all known county flagship projects for implementation by both levels of Government and Development Partners in the county. The information should be presented in [Table 4.8](#).

Table 4.8: Roads, Public Works & Transport Sector Flagship Projects

Project Name	Location	Objective	Description of Key Activities	Key Output(s)	Time Frame*	Estimated cost Ksh (Million)	Source of Funds	Lead Agency
Upgrading of urban roads to bitumen standards.	x km Moyale y km Marsabit	To improve accessibility, mobility and enhanced aviation safety and security.	<ul style="list-style-type: none"> • Earth works • Asphalt • Concrete • Bituminous surfacing Road markings Signages 	Urban roads upgraded to bitumen standard	Start: year Y End: year X	700	County	Department of Roads, Transport and Public Works

4.1.7 Education, Skills Development, Youth & Sports Sector

- Sector composition:
- Education-Early Childhood Development and Education
- Skills Development (Vocational training)
- Youth Development
- Sports development

Vision: “To be the leader in the provision of quality education, vocational training, youth and sports programs in the Country”

Mission: “To transform lives through quality education, vocational training, youth development and sports”.

Sector Goal(s)

To improve early childhood development education, provide vocational skills training, empower and nurture youths through sports.

	Disability policy developed.	No of policy developed		0	1	5	0	0	0	0	0	0	0	0	5
Sub Total															

4.1.8 Health Services Sector

Health sector comprises the following sub sectors; Medical Services, Preventive and promotive health services, Health Administration, Policy & Planning and Family health.

4.1.9 Sector composition & Key Roles

The composition and role of each sub sector is indicated in the table below:

Table 4.11: ????

Sub Sector	Composition	Key Roles
Medical Services	<ul style="list-style-type: none"> • Nursing Services • Pharmaceutical Services • Laboratory Services • Clinical Services • Mental Health Services • Rehabilitative Services • Referral Services • M & E, STD & QA, • Imaging Services • Biomedical Engineering 	<ul style="list-style-type: none"> • Ensure delivery of effective and safe health care services that are of quality, accessible and equitable across all levels of care
Public health & sanitation	<ul style="list-style-type: none"> • Community Health Services • Health promotion services • Disease surveillance and response • Environmental Health services • TB/Leprosy services • Malaria 	<ul style="list-style-type: none"> • Disease prevention and control • Ensure a robust community health services
Health administration, Policy & Planning	<ul style="list-style-type: none"> • General Health Administration • ICT services • Human resources for Health • Policy formulation and dissemination • Health care financing 	<ul style="list-style-type: none"> • Policy formulation to guide through desired sector outcomes • All-inclusive sector planning • Human resource development & management
Family Health	<ul style="list-style-type: none"> • RMNCAH services • Immunization services • Beyond Zero services • Nutrition services • SGBV services • HIV/AIDs & STI services • UHC 	<ul style="list-style-type: none"> • Ensure high quality maternal care delivered with dignity and respect • Reduce child mortality and morbidity through improved nutrition status, growth and early childhood development of young children • Reduce morbidity & mortality related to immunizable conditions through robust vaccines and immunization program • Improve uptake of FP services among the women of reproductive age • Reduce prevalence of HIV/AIDs in the county

4.1.10 Sector Vision and Mission

Vision: An efficient and high-quality health care system that is accessible, acceptable, affordable and responsive to the needs of Marsabit county population

Mission: To promote and participate in the provision of integrated high quality promotive, preventive, curative and rehabilitative health care services to all Marsabit County population

4.1.11 Sector Goals

The goal of the health sector is to attain the highest possible standard of health care that is responsive to the needs of the population. This will be achieved through the following six strategic objectives:

- To eliminate communicable conditions.
- To halt and reverse the rising burden of non-communicable conditions
- To reduce the burden of violence and injuries
- To minimize exposure to health risk factors
- Provide essential curative health services
- To strengthen collaboration with health-related sectors

4.1.12 Sector Priorities and Strategies

The sector has eight strategic priority areas in order to facilitate the attainment of the strategic objectives as shown in the table below:

Table 4.12: Health Services Sector Programmes

Sub-Programme	Key Output	Key Performance Indicators	Linkages to SDG Targets*	Baseline 2022	Planned Targets and Indicative Budget (KSh. M)										Total Budget (KSh. M)*

4.1.9 County Public Service Board Sector

County Public Service Board has three functional Directorates namely,

- i. Directorate of Human Resource Management,
- ii. Directorate of Administration, Finance and ICT and
- iii. Directorate of Compliance, Ethic and Legal Services

The functions of the County Public Service Board on behalf of the county government under the County Government Act 2012, section 59, includes

- i. Establishing and abolishing offices in its public service;
- ii. Appointing persons to hold or act in those offices, and confirming appointments;
- iii. Exercising disciplinary control over and removing persons holding or acting in those offices
- iv. Promotion/Redesignation of public servants among others

Vision: To be the champion in transforming devolved public service delivery.

Mission: To effectively and efficiently transform public service delivery through provision of professional, ethical and responsive human resources for the realization of county development goals.

4.1.14 Office of the County Attorney

The Office of the County Attorney is established by the Office of the County Attorney Act No. 14 of 2020. The office consists of the County Attorney, the County Solicitor and such other number of county legal counsel as the county attorney may in consultation with the County Public Service Board consider necessary.

Vision:

To be the model county law office by providing visionary and practical solutions to real problems and in turn, making a positive impact that can be felt by our communities.

Mission:

To provide excellent, responsive, timely, reliable, efficient, effective and innovative legal support and solutions to the County Government of Marsabit in execution of its statutory and constitutional mandate.

Goals

1. Is the principal legal adviser to the county government;
2. Attends the meetings of the county executive committee as an ex officio member of the executive committee;
3. On instructions of the county government, represents the county executive in court or in any other legal proceedings to which the county executive is a party and other criminal proceeding;
4. Advises departments in the county executive on legislative and other legal matters;
5. Negotiates, drafts, vets and interprets documents and agreements for an on behalf of the county executive and its agencies;
6. Is responsible for revision of county laws;
7. Liaises with the Office of the Attorney General when the need arises and performs any other function as may be necessary for the effective discharge of the duties and the exercise of the powers of the County Attorney.

CHAPTER FIVE: IMPLEMENTATION FRAMEWORK

5.1. Overview

The chapter outlines the county institutional framework and organizational structure that will guide the implementing of this integrated plan. It also describes the stakeholders in the county and spells out their roles, and describes how their functions are made complementary to increase synergy. The chapter further elaborates the resource requirements, sources of available resources streams, resource deficit and mobilization strategies for additional resources as to address the resource gaps.

5.2. Institutional Framework

The institutional framework for implementation of the County Government functions is anchored on organisational set up as stipulated in the County Governments Act, 2012. The section also indicates the County government organizational structure that determines hierarchy, assigns tasks to personnel and ensures the workforce works collaboratively to achieve a common vision. The framework further provides the key stakeholders and their roles as illustrated by figure 5.3 below.

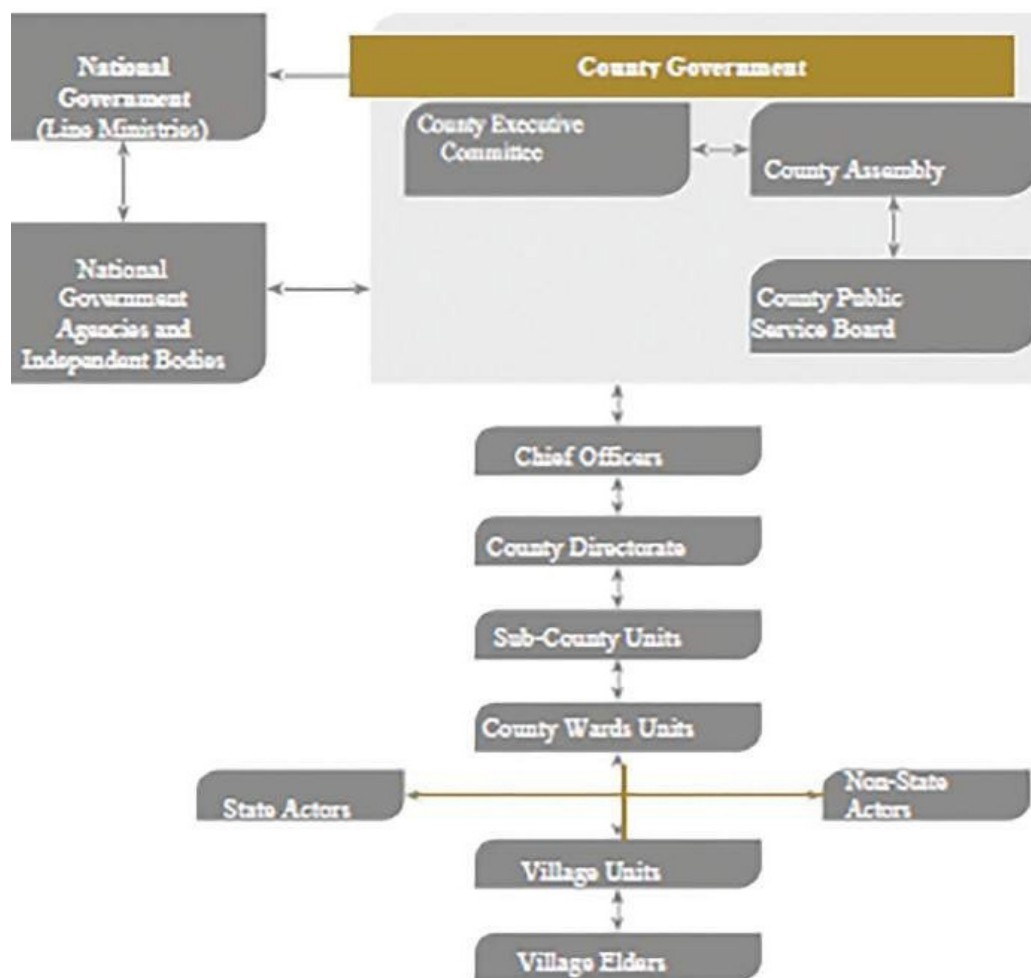

Figure 5.3: Organizational Chart

The specific roles of the key institutions towards the implementation of the CIDP is stipulated in Table 5.2 below.

Table 5.1: Institutional Arrangement

S/No.	Institution	Role in Implementation of the CIDP
1.	County Executive Committee Members (CECMs)	<p>The CECMs are responsible for managing and coordinating the functions of the county administration and its departments, implement county & national legislations and perform other functions conferred on by the Constitution.</p> <p>The County Executive Committees are also charged with the duty of providing the County Assembly with full and regular reports on matters relating to the County. The committee may also prepare and propose appropriate legislations for consideration by the County Assembly.</p>
2.	County Assembly	<p>The County Assembly is the legislative arm of the County Government which makes and amend county level laws to improve governance of county operations for the purpose of better service delivery to the electorates. The assembly also has oversight responsibilities on the county's operational activities for formulation and implementation of development projects and programmes. Other functions include approving and reviewing of plans and budgets, promoting investments through public investment committee, ensuring value for public resources, check excesses of the executive as well as promoting peace and stability.</p>
3.	County Government Departments	<p>County Departments initiate, development and implementation of policies and sector plans periodically; Undertake development and implementation of strategic plans; Promote national values and principles of governance in the public service; Oversee implementation and monitoring of performance management systems and reports to the county cabinet.</p>
4.	County Treasury & Planning	<p>The County Treasury & Planning is responsible for developing and implementing financial and economic policies in the county; oversee the development of the CIDP, ADPs, APRs, annual budget and coordinating the preparation of estimates of revenue and expenditure of the county government. They also coordinate the implementation of the budget of the county government; mobilize resources for funding the budgetary requirements of the county government and putting in place mechanisms to raise revenue and resources. They manage the county government's public debt and other obligations and developing a framework of debt control for the county. The department also spearheads Monitoring & Evaluation of Projects & programmes as well as mainstreaming of emerging & crosscutting issues into the development plans.</p>
5.	Office of the County Commissioner	<p>Collaboration in implementation of projects and programmes; Coordinate the National Government department at the county level to implement projects & Programme Monitoring and evaluation of National Government programmes and projects.</p> <p>Coordinate security and ensure coexistence and harmony in the county.</p>
6.	National Planning Office at the county	<p>Provision of technical assistance in development of county plans, policies and legislations; Participates in the development of county development plans, sectoral plans and other county policies;</p> <p>Participates in monitoring and evaluation of programmes and projects.</p>
7.	Other National Government Departments and Agencies at the county	<p>Collaboration in implementation of projects and programmes;</p> <p>Provision of technical assistance in development of county plans, policies and legislations; Provision of information and data;</p> <p>Participation in development of county development plans, sectoral plans and other county policies; Conducting research and development; Provision of resources; and Participate in monitoring and evaluation of programmes and projects.</p>
8.	Development partners	<p>Collaboration during implementation of programmes and projects; and complement the government to funds development projects</p> <p>Provision of technical assistance and capacity building Provision of disaster response support.</p>
9.	Civil Society Organizations	<p>Participation in implementation of projects & programmes</p> <p>Resource sharing, Dialogue, information sharing and exchange of views; support resolution of disputes; and support promotion of inter-county tourism and cultural festivals</p>
10.	Private Sector	<p>Facilitate development through PPPs; Provision of Service and manpower; Supplementing county government efforts through Public Private Partnership arrangement; Provision of Finances for investment; and Participation in programme and project identification and implementation.</p>

5.3 Resource Mobilization and Management Framework

This section provides the projected resource requirements by sector, revenue projections, estimated resource gap and measures of addressing the gaps.

5.3.1 Resource Requirements by Sector

During the period 2023-2027, the county has projected financial resources requirement of Ksh. 64.5 billion. The projected financial resources is derived from the sector programmes and sub programmes as indicated in chapter four. health is projected to have the highest financial requirement followed by Water & Environment department. The resource requirement for each department is presented as a percentage of the total budget in the [Table 5.2](#).

Table 5.2: Summary of Sector Financial Resource Requirements

Sector/Department Name	Resource Requirement (Ksh. Million)						Total	% of total budget requirements
	FY	FY 2024/25	FY 2025/26	FY 2026/27	FY 2027/28

5.3.2: County Revenue Projections

During the five year period the county revenue projections is Ksh. 45.5B. Eighty Seven percent of this revenue is expected to come from equitable share, eight percent from conditional allocations from loans and grants (development partners) and the remaining revenue is expected to come from own source revenue as well as grants.

The indicative revenue sources is as shown in Table 5.3.

Table 5.3: Revenue Projections

Type of Revenue	Base year 2022/	FY	FY	FY	FY	FY	Total
		2023/24	2024/25	2025/26	2026/27	2027/2028	
a) Equitable share	7,277,004,032	7,557,969,667	7,709,129,060	7,863,311,641	8,200,500,000	8,357,300,000	39,688,210,368
b) Conditional grants (GoK)							0
c) Conditional grants (Development Partners)							0
d) Conditional allocations from loans and grants (GoK)	153,297,872	224,723,404	224,723,404	224,723,404	224,723,404	224,723,404	1,123,617,020
e) Conditional allocations from loans and grants (Development Partners)	753,314,489	803,567,901	753,567,901	758,567,901	758,567,901	758,567,901	3,832,839,505
f) Own Source Revenue	160,000,000	160,000,000	170,000,000	175,000,000	180,000,000	185,000,000	870,000,000
g) Public Private Partnership (PPP)							
h) Other sources (Specify)							
Total	8,343,616,394	8,746,260,972	8,857,420,365	9,021,602,946	9,363,791,305	9,525,591,305	45,514,666,893

Source: CFSP 2023

5.3.3 Estimated Resource Gap

During the period the total county resource requirement is Ksh. 64.5B while the estimated revenue is Ksh. 45.5 B. The resource gap is estimated to be Ksh. 19B. This is illustrated in Table 5.4 where the estimated resource needs is compared against estimated revenue and variance established.

Table 5.4: Resource Gaps

FY	Requirement (Ksh. Mn)	Estimated REVENUE (Ksh. Mn)	Variance (Ksh. Mn)
2023/24	11708	8746	2962
2024/25	9420	8857	563
2025/26	13323	9022	4301
2026/27	17178	9364	7814
2027/28	12866	9525	3341
Total	64495	45514	18981

5.3.4 Resource Mobilization and Management Strategies

The county government will establish a comprehensive resource mobilization strategy. This will involve strategic planning for programme funding, close communication and effective negotiation with development partners, sound resource management, improving the image and credibility of the county and ensuring good coordination among all partners. Some of these strategies includes:

Automation of revenue collection system - Development of additional automation modules to the existing ones. This will minimize contact with cash and develop more IT enabled systems which will help seal revenue leakages.

Capacity building for staff- Capacity building of revenue staff will help them understand their mandate and familiarize themselves with the relevant laws and regulations that guide revenue collections. This will lead to improved service delivery and revenue collections.

Preparation of valuation rolls for all urban areas- A comprehensive valuation roll based on urban spatial plans will be prepared so as to ensure that the county government is objective in land rates charges. Over the years, the value of land in Marsabit County has been on the rise and this is not translated to the rates received by the county from the said property, therefore there is need to change the trend by developing the valuation roll and rate based on the site value of the property.

Tax payer education and sensitization of the community- Tax payer education and sensitization of the community will help the public understand their mandate and will ease the process of revenue collections.

Development of comprehensive revenue enhancement plan-The county will develop comprehensive revenue enhancement plan, where by, proper resource mapping is done, identification of new revenue streams and broadening of the tax base.

Establishment of one stop licensing. E.g. SBP, Public health, Liquor, fire-Currently, there are various licenses which are issued by the county government to the various business owners for regulations; these are Single business permit, Public health licenses, Fish trader's license, Liquor license. There is need to ease the issuance of the above licenses so as to enable the business to easily acquire them with ease.

Putting of proper enforcement mechanism in place-Enforcement officers will be attached to the revenue section for the enforcement of revenue laws and the collections. The revenue department will also engage the office of DPP (Prosecutors) and Judiciary in order to have a desk to deal with the matters of the county, so as to dispense with the county cases faster.

Benchmarking of the best practices in revenue collections-The revenue department will search for best practices that will lead to superior performance from other county governments and the Kenya Revenue Authority (KRA) on the best revenue growth strategies to improve performance on both in revenue collection and service delivery.

The county will also initiate Public Private Partnerships (PPPs) arrangement. The county will attract external funding through public private partnerships. The institutional framework will be strengthened for operationalizing the Public Private Partnership (PPP) and relevant legislation will be made by the County Assembly to encourage private investment in public projects. This will also include developing an appropriate fund-raising strategy which meets the community needs.

The County will also initiate a comprehensive grant planning to finance capital projects, with clear proof of long term sustainability and ownership. The county government will explore avenues of resource-sharing with the national government from resources mobilized in the county.

5.4 Asset Management

The county has an asset management system, even though it is not operational, it will therefore operationalize the system by compiling the list of its assets according to the Public Finance Management Act No. 18 of 2012. New purchases of assets will be procured in accordance with guidelines provided in the Public Procurement & Disposal Act (2005), Public Procurement & Disposal (County Government Regulations) (2013) and Public Procurement and Disposal (Preferences & Reservation) Regulations (2011) to ensure that the county government gets value for money in acquiring, using or disposing those assets.

As a precaution, the county government will carry out a re-evaluation of all county assets and compile relevant registers. The introduction of a geographical information system (GIS) will help in the management of the registers, thus enhancing accountability. Enough funds will be allocated for regular repair and maintenance as well as to carry out routine audits for verification.

5.5 Risk Management

The county will embrace strategies to manage & reduce threats (uncertainties with negative consequences) typically include transferring the threat to another party, avoiding the threat, reducing the negative effect or probability of the threat. The various portfolios at the county must embed risk mitigation in their strategic plans. The county treasury will develop risk management strategy to address financial and other risks, this will entail identification, assessment and prioritization of risks as the effect of uncertainty on objectives (whether positive or negative).

The risk,implications,level and mitigation measures is discussed iin Table 25 below.

Table 5.5: Risk, Implication, Level and Mitigation Measures

Risk Category	Risk	Risk Implication	Risk Level (Low, Medium, High)	Mitigation measures
Financial	Inadequate financial resources	Stalled projects	Medium	Resource mobilization Strategies
Technological	Cyber security risk	Breach of valuable information	High	Investment in cyber security risk management
Climate Change	Drought	Loss of livestock and reduced crop productivity	High	Climate-smart agriculture practices
Organizational	Inadequate Human Resource Capacity	Inefficiency in service delivery	Medium	Timely recruitment

6 MONITORING, EVALUATION AND LEARNING

6.1 Overview

This chapter outlines an overview of the Monitoring, Evaluation, and Learning (MEL) theoretical framework for the Marsabit County for the period beginning 2023 to 2027. MEL is a component of a results-driven attitude that aims to provide benefits and services to all citizens. Monitoring and Evaluation ensures that intended goals are met throughout the planning and execution of development activities, that corrective action (course-correct) is done when projects veer off course, and that lessons learned are applied to improve the efficiency and effectiveness of ongoing and future programs.

6.2 County Monitoring and Evaluation Structure

MEL will be mainstreamed into all development programmes and projects across Marsabit County. The government will provide enough information on development policies, programs, and projects, as well as information on the financial and other resources allocated for the objectives of transparency and accountability. The MEL system would be based on ownership and openness, giving residents the chance to take part in MEL activities at various levels. Utilizing defined

procedures and formats, project data will be collected, stored, analyzed, reported on, and used. The MEL process is anticipated to be governed by the values of methodical investigation, integrity, and honesty, providing accurate, timely, and reliable reporting of findings. The findings and lessons learned will be shared with policymakers, beneficiaries, and other stakeholders, as well as the general public, to meet their information needs and foster a results-driven culture.

For effective tracking and reporting of the plan, the County will strengthen the existing M&E structures:

- Monitoring and Evaluation Unit
- Governor’s Delivery Unit
- County Monitoring and Evaluation Committees
- Departmental Monitoring and Evaluation Committee
- Ward Development Coordination Committees

6.3 M&E Capacity

The responsibility for coordination and implementation of Monitoring and Evaluation function at the county level will be under the County’s M&E unit within the department of Economic Planning and Development. Efforts shall be made to strengthen institutional and resource capacities for effective and efficient monitoring & evaluation. This will include financial and human resources, M & E dashboard, and use of other existing digital platforms.

6.4 M&E Outcome Indicators

The M&E Outcome indicators and targets for the CIDP II are summarized in the Results Matrix below

Table 6.1: Roads and Public Works

Programme	Outcome	Outcome Indicator	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Road Network.	Improved mobility and accessibility	10 Km upgraded to bitumen standards by end 2027	2Km	2022	6Km	10Km	Roads, Transport and Public Works
		437.8 KM of rural roads upgraded to gravel standard by 2027	63.9Km	2022	246Km	437.8Km	Roads, Transport and Public Works
		1250 KM of new road opened by 2027	24Km	2022	750Km	1250Km	Roads, Transport and Public Works
		Number of river crossing (bridges /box culvert constructed)	0	2022	6	10	Roads, Transport and Public Works
Transport infrastructure	Improved mobility and accessibility	14 new vehicle, plants and machineries acquired by 2027	14	2022	7	14	Roads, Transport and Public Works
		10 airstrips maintained by 2027	0	2022	6	10	Roads, Transport and Public Works
		2 modern workshops constructed and equipped by 2027	0	2022	1	2	Roads, Transport and Public Works
building standards infrastructure	improved buildings infrastructure	1080 of projects designed, supervised and documented by 2027	744	2022	660	1080	Roads, Transport and Public Works
		2 low-cost housing units constructed by 2027	0	2022	1	2	Roads, Transport and Public Works
		Increased investment in appropriate building technologies by 2027	1	2022	3	5	Roads, Transport and Public Works

Table 6.2: Environment & Natural Resources and Water & Irrigation

Programme	Outcome	Outcome Indicator	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Enhanced availability and access to potable water for both people and their livestock	Enhanced availability and access to potable water for both people and their livestock	Proportion of HH accessing potable water	26%	2022	38%	50%	Directorate of Water Services
		Return trekking distance covered	15km	2022	10km	5km	Directorate of Water Services
Environment protection, management and conservation improved	Environment protection, management and conservation improved	% of forest and tree cover increased	1.7% FC	2022	0	2%	Directorate of Environment and Climate Change
			2.06% TC	2022	0	2.2%	Directorate of Environment and Climate Change
		Ha of degraded land rehabilitated	8ha	2022	20	25	Directorate of Environment and Climate Change
Community adaptive capacity through locally led climate change actions enhanced	Community adaptive capacity through locally led climate change actions enhanced	Incidences of climate change livelihood losses	0	2022	15	5	Directorate of Environment and Climate Change
		Number of climate resilience investment implemented	3	2022	5	8	Directorate of Environment and Climate Change

Table 6.3: Health

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Preventive and promotive health services	Reduced morbidity and mortality due to preventable diseases	4th ANC coverage.	37.9	2022	40	55	CGM and Partners.
		Skilled birth attendance rate	55	2022	60	65	CGM and Partners.
		Maternal mortality ratio	1127	2022	500	300	CGM and Partners.
		Neonatal mortality rate	60	2022	50	20	CGM and Partners.
		Infant mortality rate	33%	2022	31	30	CGM and Partners.
		% of fully immunized children 12-23 months	69%	2022	73	80	CGM and Partners.
		Average fertility rate	5%	2022	4%	3	CGM and Partners.
		Contraceptive prevalence rate	5.9%	2022	10	30	CGM and Partners.
		Adolescent birth rate	29.4%	2022	20	15	CGM and Partners.
		Global Acute Malnutrition rate (< 5s Wasting)	22.3%	2022	17	12	CGM and Partners.
		% of children under-five stunting.	25.5%	2022	23	20	CGM and Partners.
		HIV prevalence	0.9	2022	0.7	0.5	C.G. Marsabit (Health department)
		TB incidence per 100,000 population	187	2022	180	150	C.G. Marsabit (Health department)
		TB cure rate.	74	2022	80	85	C.G. Marsabit (Health department)
		Proportion of HH accessing improved sanitation	37.2	2022	47	57	C.G. Marsabit (Health department)
Proportion of HHs accessing safe and clean water	61.8	2022	65	70	C.G. Marsabit (Health department)		
Proportion of household practicing Handwashing at 4 critical times.	27.8	2022	35	45	C.G. Marsabit (Health department)		

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Curative, referral and Rehabilitative services	Increased efficiency and effectiveness of health service delivery	Outpatient utilization rate	68%	2022	75	85	C.G. Marsabit (Health department)
		Average length of (hospital) stays	10 DAYS	2022	8 days	5 days	C.G. Marsabit (Health department)
		Average waiting time for (non-elective) surgeries	10 days	2022	8 days		C.G. Marsabit (Health department)
		Percent of population accessing NCD services	20	2022	45	65	C.G. Marsabit (Health department)
		Proportion of facilities offering inpatient services	44	2022	50	65	C.G. Marsabit (Health department)
		Percent of facilities offering diagnostic services	18%	2022	25	34	CGM&PARTNERS
Administration and Support Services	Enhanced administration and support services for health sector	Doctor- population ratio	1:13000	2022	1:12000	1:11000	C.G. Marsabit (Health department)
		Nurse-population ratio (including midwives)	1:10000	2022	1:9000	1:8000	C.G. Marsabit (Health department)
		Cemoc facilities per 100,000 population	6	2022	7	8	CGM and partners.
		Bemoc facilities per 25,000 population	50	2022	60	65	CGM and partners.

Table 6.4: Education

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Early Childhood Development and Education	Increased access to quality ECD Education	Number of ECDE pupils enrolled in ECDE Centre	18,078	2022	46,000	92,000	CO – Education
		Teacher/Pupil ratio	1:44	2022	1:40	1:35	CO – Education
		Number of officers trained on CBC/ToT/INSET	0	2022	500	1000	CO – Education
Skills Development & Vocational Training	Increase access to technical and vocational training	Transition rate from PP2 to grade 1	95%	2022	98%	99%	CO – Education
		Number of trainees enrolled in Vocational Training Centres	625	2022	1,700	3,200	CO – Skills Development
		Trainer/trainee ratio	1:17	2022	1:15	1:10	CO – Skills Development
		Trainee/Tools Equipment ratio	1:1	2022	1:1	1:1	CO – Skills Development
		Number of trainers on INSET	35		50	100	CO – Skills Development
Youth Development	Increased access to job opportunities	Number of interns recruited	425	2022	2,500	5,000	CO – Youth & Sport Development
	Increased Access to star-up capital	Number of youth benefited from fund	0	2022	500	1,000	CO – Youth & Sport Development
Sports Development	Diversified sporting activities	Number of youth impacted	2000	2022	3000	5000	CO – Youth & Sport Development
		Number of competitions held	5	2022	15	30	CO – Youth & Sport Development

Table 6.5: Administration, Coordination of County Affairs and ICT

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Public service delivery systems and coordination of county affairs	Enhanced service delivery	Employee satisfaction level.	30	2022	60	100	Public service and coordination
		No of offices constructed.	5	2022	8	15	Public service Administration
ICT Connectivity and infrastructure.	Improved ICT Infrastructure and connectivity	No offices connected to the internet	10	2022	6	10	Public service Administration
Public participation and civic education	Effective and efficient civic education forums conducted.	No of people attending public participation forums.	1200	2000	5000	9000	Public service Administration
		Number of complaints lodged	20	2022	75	100	Public service Administration
Integration, peace building and disaster management	Improved conflict management	Number of reported conflicts	0	2022	30	50	Public service Administration
		Proportion of Disaster related conflicts	0	2022	60	100	Public service Administration
		Improved early warning information	No. of EWI relayed	2	2022	60	100
Strategic Communications and Public Relations	Increase awareness of Government services and operations by internal and external audience.	Number of publications	2000	2022	6000	10,000	Public service Administration
	Development of county website	Number of visitors on the new redesigned county website	2000	2022	6000	10,000	Public service Administration
Research and development	Improved research and development	No.of research studies conducted	0	2022	10	15	Public service Administration

Table 6.6: Agriculture, Livestock and Fisheries

Programme	Outcome	Outcome Indicator(s)	Baseline	Mid Term Target	End Term Target	Reporting responsibility
			Value			
Fisheries Resource management	Improved fish production and marketing	MT fish landed annually	1358 MT	1494	1793	Chief Officer of Fisheries,CD Fisheries
		MT fish marketed annually	1219 MT	1402	1626	
Livestock production and management	Improved Livestock production and output	Livestock types traded annually	Cattle-35000	15,000	18000 45000 1,360,000	Chief Officers of Livestock , CD Livestock
			Camels-29200	31000		
			Sheep and goats-826,800	490000		
		MT of honey produced annually	1.3	2.5	6.4	
		Litres of milk produced (in Million)	0.5	0.7	1.2	
Veterinary Services	Improved Livestock health and disease management	% livestock mortality rates	20	15	10	Chief Officers of Livestock, CD Veterinary Services
Food Security and Crop Development	Improved crop production and food security	MT of cereals produced annually	86	150	180	Chief Officers of Food Security and Crop Development ,CD Agriculture
		MT of beans produced annually	112	240	270	
		MT of vegetables produced annually	76	124	160	

Table 6.7: County Assembly Sector

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Infrastructure development	Improved work environment for the county assembly members and staff	Increased number of floors added to the existing County Assembly office block	2	2022			C.G. Marsabit
General Administrative service	Improved service delivery	Increase in better service delivery	1	2022	3	5	C.G. Marsabit
Capacity development	Improved capacity of members to scrutinize budget, CFSP, development plans and various reports	Increased number of trainings conducted for better service delivery to the public.	33	2022	33	55	C.G. Marsabit

Table 6.8: Culture, Gender and Social Services

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Improving, promoting, preserving and celebrating the county cultural heritage	Cohesive Marsabit county that develop and conserve its cultural heritage	No of cultural and sacred sites protected	6	2022	18	23	Culture, Gender and Social Services
		No. of cultural festivals done	6	2022	16	25	Culture, Gender and Social Services
Promoting Gender and Equality	Improved gender equality	No. of women in leadership positions	33	2022	15	25	Culture, Gender and Social Services
		No of women , youth and PWDs accessing AGPO	400	2022	600	800	Culture, Gender and Social Services
		No of women, youths who are champions of SGBV	2100	2022	870	1590	Culture, Gender and Social Services
Increasing access to social services	increased access to social services	No of social services infrastructure improved	38	2022	21	24	Culture, Gender and Social Services
		No of PWDs supported with assistive devices	3500	2022	2000	3000	Culture, Gender and Social Services
		No of vulnerable H/Hs supported with cash transfers	55,000	2022	40,000	65,000	Culture, Gender and Social Services

Table 6.9: Trade, Tourism and Co-operative

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Trade promotion and development	Enhanced conducive business environment	Number of single business permits issued	4000	2022	7000	10000	CO-Trade
		Amount of revenue generated from single business permits, stall fees in million Ksh.	100M	2022	150M	200M	CO- Trade
		No of cross border traders association formed	1	2022	2	4	CO-Trade
		No. of new societies registered	50	2022	25	40	CO- Trade
		No. of societies audited	4	2022	15	30	CO- Trade
Cottage industries and Industrial parks development and promotion	Increased job creation for the local population thus increased household incomes	Number of cottage industry established	0	2022	2	5	CO- Trade
		No. of local products certified by KEBS	1	2022	2	3	CO- Trade
		No. of investor conferences conducted	1	2022	2	3	CO- Trade
Tourism Promotion and Development	Improved domestic and international arrivals and increase in bed occupancy	No. of tourism arrivals.	1700	2022	1500	3000	CO-Tourism
		No. of bed occupancy	1000	2022	1700	2000	CO-Tourism
		Amount. of revenue generated from tourism sites	0	2022			CO-Tourism

Table 6.10: County Public Service Board

Programme	Outcome	Outcome Indicator(s)	Baseline	Mid Term Target	End Term Target	Reporting responsibility
			Value			
Public Service Delivery	Enhanced Delivery of Public Service	Proportion of citizens and public servants accessing quality services	0	20%	50%	County Public Service Board
		Level employee job satisfaction	0	50%	80%	County Public Service Board

Table 6.1.1: Lands, Energy and Urban Development

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Public service delivery	Enhanced peaceful coexistence and resource sharing	Reduced ethnic conflicts	500	2022	300	100	OOG & DRM Department
	Enhanced transparency and accountability	Customer satisfaction rate	0	2022	60%	80%	OOG & GRDU
	Improve access to public infrastructure	Enhanced household and institutional resilience	32%	2022	25%	15%	OOG/Social services/ DRM
	Strengthened drought Mitigation measures	Strengthened coping capacities of households and institutions	33%	2022	30%	20%	OOG
	Improved Multi-sectorial coordination	Joint work planning and monitoring	5	2022	10	20	Office of CS

Table 6.12: Finance and Economic Planning

Programme	Outcome	Outcome Indicator(s)	Baseline		Mid Term Target	End Term Target	Reporting responsibility
			Value	Year			
Public finance management	Improved financial management	Amount in own source revenue	100	2022	150	180	Finance and Economic Planning)
		Amount of pending bills	TBC	2022			Finance and Economic Planning)
		Absorption rate	95	2022	96	98	Finance and Economic Planning)
		Status of audit report	TBC	2022			Finance and Economic Planning)
		AGPO	32	2022	34	35	Finance and Economic Planning)
Economic policy and planning	Improved economic policy formulation, planning and M&E	Alignment between key planning documents (CIDP, ADP, CFSP and budget	80	2022	90	95	Finance and Economic Planning)
		Project implementation rate	TBC	2022			Finance and Economic Planning)
		Annual statistical abstract produced	0	2022	3	5	Finance and Economic Planning)

6.2 Data Collection, Analysis and Reporting

The methods for data collection will largely depend on the kind of indicators required to monitor different projects/programmes. As such, both quantitative and qualitative data will be collected. Field observations, stakeholder meetings and interviews with key persons will be used to collect quantitative data. On the other hand, qualitative data collection methods will include surveys, questionnaires, departmental progress reports and various publications from different organizations. Data collected will be subjected to preliminary analysis which includes data disaggregation and cleaning.

To establish successes, challenges and weaknesses in the implementation of various projects and programmes, reporting of M&E findings is critical as it provides feedback and establishing whether the stated objectives are on course or not, plus guidance on any corrective measures. County quarterly monitoring and evaluation reports will be prepared based on reports generated on monthly basis from the Ward Development Coordination Committees. Semi-annual and annual M&E reports will be prepared which will eventually culminate in the production of the County Annual progress Report. The progress reports will outline the achievements of the sector targets, the challenges and provide recommendations on the implementation of the ADP.

6.3 Dissemination, Feedback Mechanism, Citizen Engagement and Learning

There are multiple avenues for the dissemination and citizen engagement. The plan will be disseminated to the citizens through public dialogue forums, County Website and social media platforms such as twitter, whatsapp, Instagram and the M&E dashboard. It will also be presented to the County Budget and Economic Forum. Progresses will also be relayed and discussed in the mainstream media including Newspapers, local Radio and T.V stations. In addition, the Governor in a given State of the County Address meetings will give feedback to the citizens and stakeholders. Moreover, quarterly, annual and end of plan period reports shall be prepared and disseminated to the public and stakeholders.

6.4 Evaluation Plan

This section should identify key policy/programmes/projects for evaluations during or after the plan period. This may include rapid evaluations, impact evaluations, CIDP mid term/end term Reviews or any other type of evaluation. The evaluations proposed can be at program or sector level. Due to the cost implication of evaluations, the proposals should be limited to key priority programs/Areas (The criteria for selecting programs to include in this plan as well as template for presenting the plan are available in the Kenya Evaluation Guidelines, 2020). The Plan should be presented as in Table 6.13

Table 6.13: ???????

Policy/ Programme/ Project	Evaluation Title (specify the type)	Outcome(s)	Use of the Evaluation Findings	Commissioning Agency/ Partners	Anticipated Evaluation start date	Anticipated Evaluation end date	Evaluation Budget Millions (Kshs.)	Source of Funding
CIDP	Midterm Review of the Third Generation CIDP 2023-2027	Improved programme design and implementation.	Shape decision making	CEC Planning and Finance	June 2025	Sept 2025	10	MCG/GoK/ Donor
	End term Review of the Third Generation CIDP 2023-2027	Improved programme design and implementation.	Lessons learnt shapes future planning	CEC Planning and Finance	July 2027	Sept 2027	10	MCG/GoK/ Donor
Office of the Governor	Public service delivery	Customer satisfaction rate	Enhanced service delivery	Improve service delivery	County Secretary	Aug 2025	Sept 2025	3 Million
Education Programmes e.g. Bursary and Governor's scholarship programmes
